Better Products, Lower Prices, Faster Turnaround

We are rapidly becoming South Jersey's #1 source for fast and efficient cylinder resealing. We currently service some of the largest contractors in the Tri-State area whose business cannot sustain machine downtime, as well as major utility, forklift, maintenance, manufacturing, farming, and marine companies, just to name a few. We've earned the trust of all the local municipalities, and have even become the go-to source for other companies that reseal their own cylinders when expertise is needed. Call us today to inquire about our current cylinder components manufacturing and welding, as our capabilities are always expanding.

Two In-House Cylinder Benches:
Tuxco Pic →
- up to 40,000 lb-ft of torque
- cylinders up to 26 ft. long
- high speed piston/gland nut runners

Need replacement cylinders? EHI Mobile Solutions has built a network of new aftermarket and refurbished hydraulic cylinder distributors to get your machines running again at a fraction of the OEM costs. Give us a call today!
