

Townnew

Automatic Motion Sensor Self Sealing & Replacing Kitchen Waste Bin Bag System

**NEW REPLACEMENT CARTRIDGE REFILL HEAD RING – HEAVY
DUTY STRONG RECYCLABLE & BIODEGRADABLE INTERNAL LINERS**

REFILL YOUR TRASH BIN EASILY

The TOWNNEW recyclable replacement bin lid rings offer an easy to use, environmentally friendly and sustainable option to traditional bin bag liners. Each TOWNNEW replacement holder is designed to hold as much rubbish as possible while being eco-safe

BIODEGRADABLE AND RECYCLABLE

Our self sealing bin bag liners come in recycling and biodegradable options. Choose between a biodegradable high-density HDPE material containing oxidative degradation agent or recyclable high-density Polypropylene Plastic (PE)

UP TO THREE MONTHS USE

Each purchase will give you three refillable TOWNNEW sensor bin bag holders. Each cartridge holder contains 25 durable waste rubbish bags of either recyclable or biodegradable material and will last up to one month based on regular usage

REPLACE QUICKLY AND EASILY

The TOWNNEW Auto bin requires little to no maintenance other than recharging and replacing the rubbish bag refills each month, automatic mining the cartridge is simple and hassle free: all TOWNNEW electronic bin holder fit perfectly inside.

TOUGH AND DEPENDABLE

Whether you choose our recycling bin bag liners or our bio degradable dustbin liners, you will find either choice is strong, thick and reliable. Leak-proof and puncture-proof, you will be able to carry heavy loads easily without spillage.

Description

CES 2020 Innovation Award

Trade in your old garbage bin liners for TOWNNEW refill cartridge, made from eco friendly biodegradable HDPE Material or recyclable HDPE (High-Density Polypropylene) Material.

Kitchen waste bin liners that are safe for the planet

Along with the innovative TOWNNEW self sealing and self changing bin comes a range of recyclable and biodegradable bin liners. Our heavy duty bin bags are designed to minimise their impact on the environment as much as possible by using eco friendly alternatives to traditional plastic. Our recycling bin liners are made from premium Polypropylene Plastic (PE), a thermoplastic polymer that is sustainable and easily recyclable. Alternatively, our biodegradable trash bags are made from an HDPE material, with biodegradation technology allowing them to completely decompose into carbon dioxide and water. Reducing the amount of plastic ending up in landfill and oceans. Not only does using your TOWNNEW trash can make waste disposal much easier but also better for the planet.

These recyclable and bio degradable swing bin liners have many benefits over traditional rubbish bags. The TOWNNEW dustbin ring is easy to replace: just open the lid, remove the magnetic ring retainer and pull out the empty ring. Insert the new TOWNNEW replacement ring within the retainer and place it back within the sensor bin. Each pack comes with three rings, with each ring lasting a month with average usage. All compostable bin liners are leak proof and odour resistant, so no foul smells or liquids will escape. In addition, all our garbage bags are designed to completely fill the inside of your bin, meaning no space will go to waste.

Durable and reliable trash bags

The TOWNNEW bag is designed with a material that gives strength and reliability. Even with the heaviest load these bags will not tear or puncture. All TOWNNEW refill rings come in a 20.4 x 20.4 x 3.3 cm size and weigh 139 g and are designed to work exclusively with the TOWNNEW TL.

EACH CARTRIDGE HAS 25 BAGS, 3 CARTRIDGES PER PACK, A TOTAL OF 75 BAGS.
