

Is it time for a better phone system?

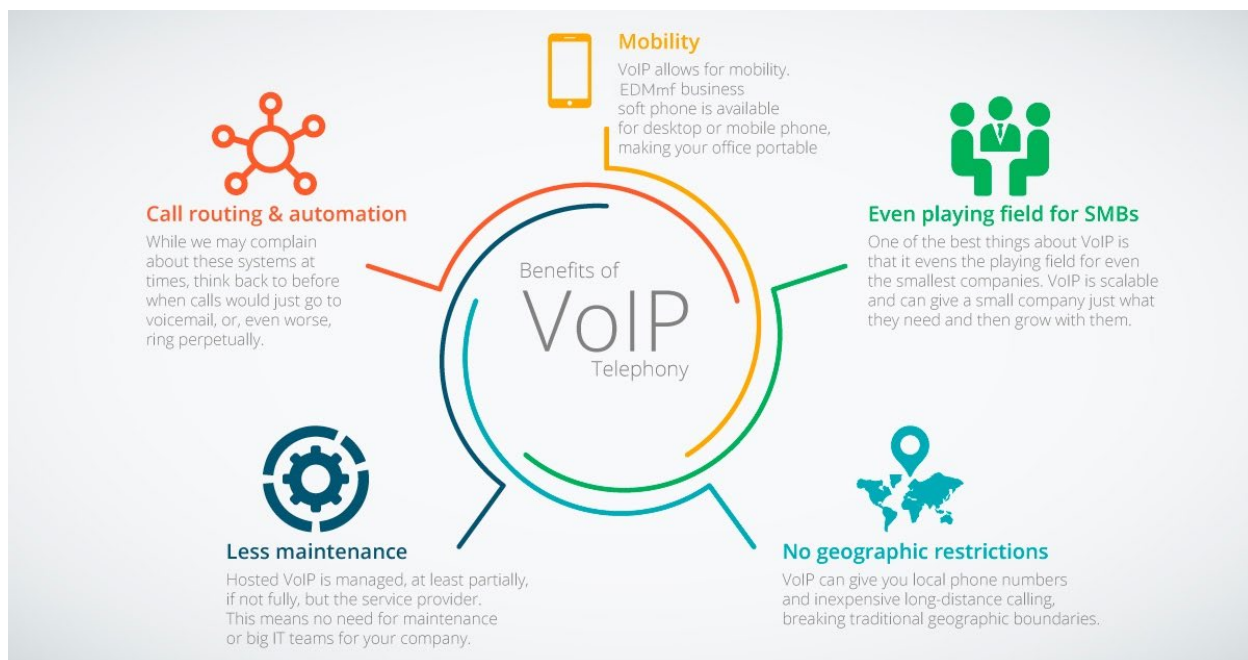

Americas most popular phone system -Voice Over IP (VOIP)

What is VOIP?

VOIP offers a very versatile, low-cost solution for phones and communication that can easily scale with the growth of your business.

Hosted VoIP Phone System

A fully featured phone system that runs in the cloud with an easy-access online portal for administration and user management. VOIP includes routing work-flows, music on hold, call queues, web phone app and much more.

Why Choose Our Hosted VOIP Phone Service?

At EDM Automation our business phone service is best-of-breed that utilizes redundant servers in geographically disperse regions throughout the country to ensure high reliability and sound quality.

Additionally, people appreciate the following...

- **Competitive pricing:** Low flat-fee pricing for unlimited local and long-distance phone service. Our pricing includes an extensive feature list that includes routing by time-frames, easy to create work-flows, company greeting and menu-list (Auto Attendant), ring-all or find the available staff member, call-center reporting and more.
- **No set-up fees!**
Let us do the heavy-lifting. We will plan and configure your dream phone system as part of our service.

- **Quality phones**
We include business phones by Yealink and we support most VOIP phone manufacturers including Panasonic, Yealink, Polycom, Cisco and many others.
- **Call Center**
Track stats on call-center flow, abandoned calls, voicemails, hold times, and more. Our granular reports and call center manager portal allow you to manage your team better than ever.
- **Audio & Video Conferencing**
Audio conferencing and video conferencing are a rising need for modern business. Remove the need for multiple applications and handle all client communication under one platform.

We are a full-service VOIP phone system vendor. Our services include...

- Planning
- Phone sales
- installation
- support
- management
