

WARNING:
HAZARD STATEMENTS:
CAN CAUSE SERIOUS EYE
IRRITATION

CAN CAUSE SKIN IRRITATION

****EYE AND SKIN PROTECTION REQUIRED****

Recommended Dilutions:

- Heavy Duty Cleaning: use straight from container
- Medium Duty Cleaning: 1:1 mix of water with product
- Light Duty Cleaning: 3:1 mix of water with product

- Always test an inconspicuous area first for proper dilution and dwell time especially on soft metal surfaces and concrete.

- If ImpervaCleanV3 contacts skin, simply flush with water. IF IN EYES: Rinse continuously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical attention.

- Average dwell time is between 1-10 minutes. Always test first to ensure proper dwell time. For tough built up staining, repeat short rounds of applying product on surface for short dwell times under 5 minutes, then simply rinse. Repeat for as many rounds until surface is clean.

Note: Process may need to be repeated in certain situations.

- Note: brush is not always needed . Please always test first to see if you need.

- Do NOT let product dry on soft metal or concrete surfaces.

Instruction Guidelines:

General Equipment Needed:

- Personal protective gear: gloves, safety goggles, long sleeve clothing
- Soft bristle brush only if needed.
- Pump Up Sprayer or Spray bottles
- Pressure Washer (recommended 2500-4500psi) or hose
- Rotary Turbo Nozzle

* If the graffiti is stubborn to remove, please incorporate our ImpervaCleanXTRA into cleaning regimen. Please review our graffiti instructions cleaning manual prior to application*

1. Always review product data sheet first and test inconspicuous area first for proper dilution ratio, dwell time, and to see if a scrubbing brush is needed.
2. Apply product onto surface. Let it dwell between 1-5 minutes. Do not let it dry on surface. Only scrub with a brush if needed.
3. Rinse with hot or cold water.
4. Repeat process if necessary

cleanV3

Specialized Cleaning Formula Designed To Remove Graffiti

*** Non-Toxic - No DOT Hazard Class - Non-Flammable - No Smell - No VOCs - Non Caustic Solution***

****Does not harm plants****

More than half of graffiti cleaners break down ink or paint causing it to run down the surface and create residual staining. They also require intense scrubbing that can easily etch the surface and further embeds the stain in the surface.

With ImpervaCleanV3 inks and paint are suspended from surface, thus preventing them from re-penetrating the surfaces and creating a drip down residual staining effect. Simply let ImpervaCleanV3 dwell on the surface and rinse with water. ImpervaCleanV3 eats away the paint layers with minimal to no scrubbing required.

- * Cleans graffiti & vandalized surfaces
- * Restores surface to original condition
- * Removes older graffiti stains
- * Removes paint, including enamel paint
- * Contains degreasing properties
- * Performs in all weather & temperature conditions
- * Eliminates need for sandblasting
- * USDA approved for use in food service plants

For use on below substrate surfaces including bare, painted, finished, polished, substrates:

*(*at recommended dilutions for specific job types please review instruction manual prior to application*):*

Concrete - Masonry - Brick - Stucco -
Stone - Cinderblock - Terra Cotta
Barrel Tiles - Warehouse Flooring -
Equipment - Metal - Glass - Vinyl
