

Great job on the logo design. I have the following comments to adjust and finalize.

1. Could you adjust the right arm of the matador where it meets the bull. It looks a little off.
2. Could you taper the matador's arm/sleeve a little where it connects to the cape. Maybe round the corner of the cape a little as well.
3. Could you make the gaps between the matador, the bull and the cape a little more uniform throughout.
4. I think it might look better to remove the flap of the bull hanging between the two legs.
5. Could you adjust the bull's left foot a little so it is less flat at the bottom. More like the right foot.
6. Please round this corner of the cape a little.
7. The matador's right foot looks a little disproportionally large. Could you make it slightly smaller.
8. I would love to have an all black version of the logo and a multicolor version. For the multicolor version, I was thinking of using four dull colors (nothing bright). A blue for the matador, black for the bull, red for the cape, and dark grey for the text. I have given some examples above, but does not have to be an exact match.
9. Could we use a more modern font. Something without the flares. I am not sure the correct terminology. I have included sample text from another submission that I liked. The two tone text might also be a good look.
10. Could I see a version with the text to the right of the logo as well as below to choose between before finalizing.
