How to Operate Wine Winch:

1. Remove foil from the wine bottle using the free FOUR-BLADE FOIL CUTTER which is included in the box.
2. Press the POWER button. The transparent light skirt will shine a steady green light indicating operation is a GO.
3. Place the wine bottle against the BULKHEAD in the base and holding the bottle firmly with two hands raise the bottle gently upward into the

4. Remove the wine bottle from the base.
5. Press the DROP CORK button and catch the cork in your hand.

Bottle Neck Guide as far as you can. Always keep the bottle in a vertical position. The spiral will automatically begin rotating into the cork and remove the cork upward out of the bottle neck. When the red light begins flashing, the cork is out.
