

I select this, your original design, as the winner. I like this better than the two revisions with different buildings.

I would like some revisions to see if you can make this design look better.

I would like you to try making the following revisions.

- Make the bottom of the circle a darker orange to add more contrast between the dark orange and light yellow. Maybe that will make the logo more eye-catching.
- Try making the feathers on the bird wings a little smaller or thinner and closer together, especially the upper feathers.
- Make a version that looks good in Black & White.
- Add a space between ECO and FORESIGHT (ECO FORESIGHT).
What Font did you use for the words?
- Maybe make the buildings a little smaller.

I like that the design has clean lines. If it won't make the design too busy, add one or two plants like those on the left side of the logo, but with a seed head that looks like this:

Thank you!
