

Who PerMix Is

PerMix is an Israel based engineering & manufacturing company that provides innovative, performance driven mixing solutions across all industries since 1954

With multiple manufacturing facilities, 10 global offices, & over 40 global agents, along with over 10 system integrators, PerMix is one of the most disruptive brands in the industry

What We Make

PerMix leads the industry in innovative, performance driven, Value Added Engineering mixing solutions of all types for all industries. **With over 28 types of mixers, we lead the industry in mixing solutions when it comes to mixing powders, liquids, or pastes. The largest selection of mixers available of ANY brand in the industry.**
Our three main core focuses are:

- Stand Alone, Single Machine Offerings: Our stand alone, single machine offerings set standard specifications with Value Added Engineering, allowing for high performance, top tier quality, & semi-custom configurations to be ordered with ease at a cost effective price
- Our OEM division has built some fo the best brands in the industry, with no minimum orders, no contracts, & incredible quality, it is not wonders others rely on us to build their brand.
- Our Custom Engineered Products division has engineered & manufactured for brands of Forbes Top 500, as well as the needs of entrepreneurs globally, allowing for history to be made as well as start ups to succeed. From single item solutions to complete lines, PerMix can provide complete, system integrated, turn key projects.

Service & Support

PerMix leads the industry in innovation, but innovation also needs to be maintained & backed. As such, PerMix’s philosophy of “Sustainability through superior engineering” has allowed PerMix to accelerate in markets others fail. Our standardization of parts combined with our streamlined approach to service has enabled us to minimize downtime & maximize customer satisfaction on a global level, something most other brands fail at.

Our Service & Support Team have three main categories and is developed to provide service & support:

- Facility Sponsored Service: For larger facilities that have in-house engineering teams PerMix has an in-house training program that is hands on, virtual, & web based supported. Custom spare parts packages can be designed to minimize down time & maximize efficiency of maintenance crews
- PerMix Sponsored Service & Support: PerMix aligns with local service partners in areas where service is needed and facilities are not large enough to have their own teams. PerMix offers the same support & training to these teams & spare parts packages will be sent into regions where installations are commissioned. If an area does not currently have support, PerMix will, during the lead time of building machine, meet & negotiate with respected regional service teams, negotiate a contract, train, & supply parts, allowing customers to be confident in our service & support.
- Facility Sponsored, External Service: For companies that currently have a working relationship with a service provider, PerMix will meet & negotiate service terms, train, & support with spare parts packages, allowing companies to maintain comfort levels of service while maximizing the ability of PerMix to service the equipment if needed in confidence.

Warranty

PerMix’s approach to warranty is unsurpassed in the industry, ensuring a quick ROI for customers, while providing warranty coverage well after ROI is achieved, ensuring profits stay where they belong, in the customers pockets.

Our Global Warranty Coverage focuses on minimized down time, maximized customer service, & quick response in a time of need. Globally, PerMix has a cost of warranty that is below 2% per year. This is a result of our stellar quality & standards PerMix sets in our production standards.

Who We Serve & Our Experience

From the entrepreneurs of today, to the leading brands of yesteryear & today, as well as the start ups of tomorrow, PerMix serves all industries with our mixing solutions.
