

74*73*200mm

ELECTRONIC MOUSE TRAP

ELECTRONIC MOUSE TRAP

4 AA BATTERIES ELIMINATE UP TO 90 MICE

QUICK & HUMANE

Humanely removes up to 90 rodents

SMART RODENT DETECTION

Built-in safety sensors to protect kids and pets

EASY CLEANUPS

No-touch, no-see, no-mess disposal

NEW & IMPROVED DESIGN

Efficient zap system with no-escape tunnel design

Each Mouse Trap Requires 4 AA Batteries (Batteries Not Included)

WARNING

Electric Shock and Spark Hazards

Ignition: Use indoors on dry, clean surfaces. Do not get near unvented flammable vapors, liquids, or flammable solids. Do not use in barns, stables, or similar wet, dusty locations.

High Voltage: Keep out of reach of children and pets. Use only dry hands or rubber gloves to handle. Turn off the power and remove the parts before placing the bait. Do not touch the metal piece when the device is turned on.

Electromagnetic Waves: Keep pacemakers and other life-sustaining equipment at least one foot away. If you have received an electric shock, please consult your cardiologist. Failure to read and follow all precautions may result in electric shock, fire, or serious injury. Please read and follow all label instructions.

WARNING

This product may expose you to lead or lead compounds that may cause cancer, birth defects or other degenerative damage in accordance with CA regulations. For more details, please visit www.P65Warnings.ca.gov.

OWLTRA

Electronic Mouse Trap Model No : EMZ30
US. Pat. 29683694, and other pending patents
EPA Est.No:95649-CHN-1
www.hiowltra.com
Design in USA
Made in China

HOW TO USE

1. Before adding bait, turn the switch to the OFF ("0") position
2. Pull and remove the top chamber. Use only a pea-sized amount of peanut butter in the bait area. DO NOT let the bait touch the metal plate surfaces or the sensor detectors, as it may cause a malfunction.
3. Attach the top chamber back into place. Insert 4 "AA" batteries and turn the switch to the ON ("1") position. The green light will flash to indicate the trap has been activated.
4. Place the trap on a clean, dry surface along a wall. Position the trap so that the entrance is facing away from the wall.
5. Once a rodent is caught, the green light will flash at 10-second intervals.
6. A flashing red light indicates low battery life.
7. **Rodent Disposal:** Turn the switch to OFF ("0") and remove the batteries. Pull and remove the top chamber and properly discard the rodent. Follow the cleaning instructions on the trap or in the manual.

HOW TO CLEAN

1. Turn the switch OFF ("0") and remove the batteries. Pull and remove the top chamber.
2. **Clean:** Use warm water or hydrogen peroxide topical solution and a soft-bristle brush to clean the chamber. DO NOT get any water on the electronic top.
3. **Dry:** Air dry the interior and exterior chamber completely. Dry hands thoroughly.
4. **Reassemble:** Attach the top back into place.
5. **Reload:** Repeat the trap use instructions from steps 1-4.
