

Activity Page

There are multiple different types of activities, but all activity pages follow the same format. The redesign should be able to support the two most distinct types of activities: multiple choice and dialogue. You can either design one template that fits both of these activities, or two slightly different templates.

Must have:

- Directions
- Series of questions and answers
- One or two video players depending on the type of activity
- Option to reveal each answer
 - Teacher-view only
 - Not on the dialogue activity
- Submit button
