

# Whistlebrook

## Insight Through Intelligent Solutions

## Company Overview

### Specialist Software for the Financial Services Sector

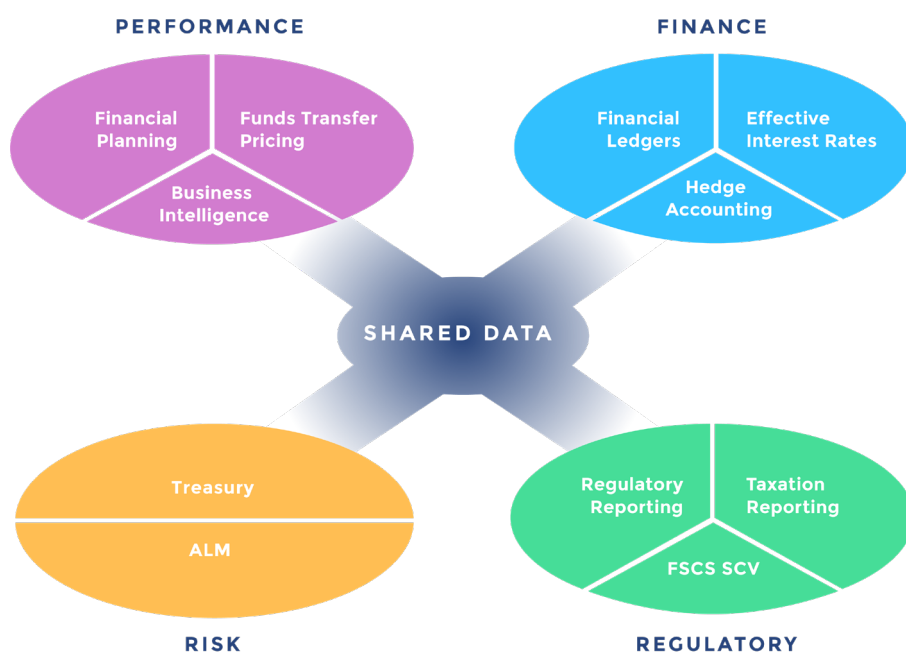

*Whistlebrook has specialised in providing innovative software solutions for the financial services sector since 1997. In that time we have built a very successful portfolio of software applications that can each be installed on their own, or as an integrated suite that can deliver extra benefits by sharing information.*

Over 50 Financial Institutions already use our software and that number is growing. Our customers range from investment management firms, through banks of varying size, to 2 of the 3 largest building societies.

#### Whistlebrook packaged software solutions

Our highly functional software can provide solutions for operational problems, insightful performance and financial analysis, leading to improved efficiency and profitability.

Whistlebrook develops all of its own software, in the UK, with major input from our customers. As a result our applications are specifically built for financial institutions with tailored functionality that really helps our customers to run their business more efficiently. It also means that we regularly enhance our software and introduce new applications following customer suggestions, our own on-going analysis, and regulatory changes.

#### Customer Case Studies

##### The Coventry Building Society

The Coventry has implemented our Regulatory Reporting system. This enables them to create, validate, approve and electronically submit their regulatory reporting forms, including daily liquidity reports to the FCA and BoE.

##### Masthaven

Whistlebrook have been working with Masthaven since the granting of their Banking Licence and have implemented several key applications to ensure the smooth running of their business. These include Whistlebrook's Regulatory Reporting (WIRES), Treasury Management, Effective Interest Rates, Financial Planning and Financial Ledger systems.

##### Yorkshire Building Society

The Yorkshire use our Financial Planning, Funds Transfer Pricing and Margin Management systems. This has resulted in greatly improved accuracy in its planning and margin forecast, with the ability to quickly analyse actual versus plan differences.

##### The Monmouthshire Building Society

The Monmouthshire Building Society replaced its existing Treasury system with Whistlebrook's Treasury Management System. It streamlined and improved processes while providing sophisticated reporting capability and supporting decision making with accurate data.

##### United Trust Bank

UTB is a fast growing bank that has chosen Whistlebrook as a strategic partner. So far UTB are using our Regulatory Reporting, Planning and Business Intelligence solutions.
