

ENDO-ECTO Paks contain both endo (arbuscular) mycorrhizal inoculum and ectomycorrhizal inoculum. Both mycorrhizal groups are known to increase nutrient and water availability to colonized plants. Best results occur after soils have been fumigated or severely disturbed.

BENEFITS:

- All Natural - Non Toxic
- Reduces Drought Stress; Water & Fertilizer needs
- Increases Plant Quality & Yield; Water & Nutrient Storage & Uptake
- Promotes extensive root system and soil structure, Plant establishment

STATEMENT OF CLAIMS:

Tri-C Enterprises, LLC certifies that both endo/arbuscular Mycorrhizae and ecto Mycorrhizae are present at the rates claimed on this label. Mycorrhizal symbiosis is sensitive to environmental conditions and Tri-C Enterprises is unable to guarantee the product beyond this statement.

Expiration Date: _____

CAUTION: Do not swallow. Keep out of the reach of children and animals. Store in cool, dry place.

MYCO PAK

Endo-Ecto Mycorrhizal Inoculum *For Most Plants*

AUXILIARY SOIL AND PLANT SUBSTANCE
NON PLANT FOOD INGREDIENT
