

Delta Risk Corporate Overview

Bridge the Gap to
Modern Cyber Security

Operating and growing a business in today's environment of increased cyber threats is a challenge for every organization. Most organizations are also rapidly shifting applications to software-as-a-service (SaaS) providers and workloads to public cloud environments, while enabling employees to work from anywhere. This has put even more pressure on security professionals, who are already struggling to keep up with too many tools and a lack of trained staff to effectively respond to cyber security threats. The business is transforming IT, and your security program needs to transform as well. Delta Risk can help you bridge the gap to an effective, modern security program.

Delta Risk offers cloud security, SOC-as-a-Service, managed security, and professional services to commercial and public sector organizations. We provide the visibility and control you need for effective cloud, endpoint, and network security. ActiveEyeSM, our proprietary platform, uses Security Orchestration Automation and Response (SOAR) to optimize and scale Managed Detection and Response (MDR) capabilities across the enterprise. Our US-based cyber security experts provide 24x7 monitoring, consulting, and guidance to our customers on their journey to a secure environment.

Our professional services include penetration testing, tabletop exercises, vulnerability assessments, threat hunting, and incident response. We also offer assessments for cloud applications and infrastructure, as well as mobile and web applications, to detect and remediate problems faster and more cost-effectively.

A Modern Security Approach

There is no single security solution that answers all needs. We take an agile and data-driven approach when it comes to designing our solutions to respond to changing requirements and environments, as well as technological advancements. Our approach involves co-discovery and joint problem-solving with clients and partners to find the optimal response for their challenges. Our team incorporates methods and learnings from the national security arena to evaluate and improve cyber operational readiness in the private sector.

Advisory Services

Delta Risk offers a range of professional services, including penetration testing, vulnerability assessments, and exercises, as well as assessments for cloud infrastructure, web, and mobile.

Managed Security

ActiveEyeSM combines the latest technology with experienced, US-based analysts in our 24x7 SOC to secure your systems and data in cloud environments, networks, and endpoints.

Response Services

We provide the expertise and tools to detect, contain, and eliminate attackers on your network. Our threat hunting and incident response services find and remediate problems faster.

Delta Risk Corporate Overview

Our People

Technology alone will not solve your security challenges. Our security experts help you find the tools and services that best fit your needs. We are in business to help our clients achieve their critical cyber security goals, whether that means delivering hands-on training, consultative and advisory services, round-the-clock monitoring of endpoints and networks, or diving into network testing battlegrounds. Expert analysts work 24x7 in our US-based security operations center (SOC) to quickly alert you to any issues, and to initiate appropriate response actions to mitigate the damage from a security incident or breach.

We value our people as individuals, as problem solvers, and as the exemplars of our core principles. Our team – including technical consultants, developers, analysts, engineers, marketing, sales, and leadership – are seasoned cyber security experts. They have hands-on experience working at a wide range of companies and organizations, ranging from startups to Fortune 500 firms, managed security service and cloud infrastructure providers, to military cyber defense operations.

Our History

Established in 2007, Delta Risk was founded by a group of military cyber security specialists with deep knowledge in policy, infrastructure protection, technical security, cloud security, and governance. The company has invested heavily to deliver a modern, SaaS security platform and build an innovative SOC that provides a complete suite of security solutions for public and private sector clients.

Since 2016, Delta Risk has been named a Top 10 Managed Security Service Provider by *Enterprise Security* magazine, a Top 25 Cyber Security Company by *CIO Applications* magazine, and one of the 30 Most Innovative Companies of 2018 by *CIO Bulletin*. In 2019, *Government CIO Outlook* recognized Delta Risk as a Top 10 Security Solution Provider for the public sector. MSSP Alert has also recognized Delta Risk multiple times as a Top 50 Managed Security Service Provider.

Amazon Web Services (AWS) Advanced Technical Partner

What does our Advanced AWS partnership mean for you? It means you are working with an expert service provider that understands AWS. To qualify for the APN Advanced Partner tier, partners must meet thorough requirements that demonstrate the scale of their AWS expertise, capabilities and engagement in the AWS Ecosystem. We work with AWS environments 24x7 and can help you avoid common pitfalls and risks.

GSA IT-70

U.S. General Services Administration (GSA) has recognized Delta Risk's cyber security expertise by awarding an IT-70 contract, #GS35F482GA and all four Cyber Special Item Numbers (SINs).
