HOSE CLAMPS BANDING & SADDLES CUSTOM SOLUTIONS INDUSTRIES CASE STUDIES

Logo

DOWNHOLE APPLICATION
COLOMBIA

Banner/slider of images of project case study

PROJECT SCOPE

This area details what the need was for the project(s) - purpose, location, timing etc.

REASONS FOR CHOOSING HCL

HCL's downhole Cable protection system has been successfully installed in Colombia for three different project on ESP Wells since 2014. The client cited various reasons for using HCL products:

1. Metal Bands – Problems caused by Failure & damage to Cables along with complications in fishing Stainless Steel Product (Apiay – EcoPetro)

2. Cost – Cost of alternative metallic cross coupling protectors was higher than the HCL solution – (Caño Limon)

3. Corrosion - In the mature fields with water injection corrosion is a major problem (La Cira- Infantas)

4. Successful previous installation – Clients successful installation in Caño Limon influenced the decision to install on La Cira-Infantas
