

I need a logo design for a new company based in Rome called "Spazio interiore".

I am an interior architect, I redesign spaces and furnish them (mainly with design objects according to the client's budget) but the main focus is on design beyond comfort and functionality.

I also furnish with furnishing accessories so that the space is beautiful, functional, and complete, welcoming and warm (I never leave an empty space, a table with a plant, a book, a painting, a candle, everything that makes a space complete) I also deal with offices for this spaces in general.

I would like the concept of space and the concept of design to be perceived in the logo. I go around with a wooden cargo bike and I would like to engrave the logo there.

I like simple things simple lines only back and white minimal design
