

## High Potency Triglyceride Form

Each fish gelatin capsule of Omega blu™ contains 1350 mg of Ultra-Intensity-Omega-3 (UIO-3) fish oil, which is our unique blend of EPA and DHA (55:25) in the triglyceride form. One capsule meets the recommendation of the American Heart Association. Two capsules provide over 2700 mg of UIO-3 and 2500 mg of total omega-3: making Omega blu™ one of the highest professional grade fish oils available.

Our specially formulated capsule was developed by Dr. Sancilio, an award-winning pioneer in the pharmaceutical industry. In research performed over decades, purified omega-3 is reported to promote healthy cholesterol and triglyceride levels, as well as supporting our heart, brain, and eyes.

More recently, scientific research reports that the essential fatty acids as in Omega blu™ can help joint function and the health of the immune system. Especially because of our ultra-intensity triglyceride form, absorption of Omega blu™ is superior to other fish oil products with less fishy taste or burping.
