Estate Turf Program			
Service	Description	Dates	Price
Early Spring	Complete, granular fertilizer and pre-emergant crabgrass control	April 1 - April 22	
Spring	Complete, granular fertilizer with iron and broadleaf control	April 23 - May 13	
Early Summer	Complete, granular fertilizer with iron and broadleaf control	June 4 - June 24	
Late Summer	Post-emergent crabgrass and late summer weed control	June 16 - Aug 5	
Early Fall	Complete balanced fertilizer with iron and weed control	Aug 20 - Sept 9	
Late Fall	Granular Fertilizer w/ high potassium to winterize lawn	Oct 1 - Oct 31	
Aeration	Due to the constant compaction of soil from mowing and foot traffic, we recommend a yearly aeration of the lawn. It helps get nutrients, water and air down to the roots of the soil. Creates strong root growth. Vital Service for a superior lawn.	Aug 20 - Oct 15	
Grub Control	Highly effective, preventative treatment for grub control.	Mid Summer	
Lime	Essential application to maintain proper PH of soil.	Early Spring or Late fall	
Fungicide	Preventative and curative treatment for various turf diseases.	Throughout season	
Nutsedge	Highly effective treatment for nutsedge (Fast growing, unsightly yellow weed)	Mid Summer	
Bentgrass	Specialty Application for treatment of unsightly spreading creeping bentgrass.		
Slit-Seeding	Guaranteed method of slicing the soil to sow new seed directly into soil. Custom seed blend specific to your property. Done in a criss-cross pattern for complete coverage.		
Overseeding	Broadcast method of incorporating seed immediately after core-aeration to replenish old lawn with new seedlings. Recommended yearly.		
Soil Samples	Essential service, provides us with lab results of soil structure to effectively bring soil to proper alignment.		
Total			\$0.00
