mation on Dr Clough

Indications for Bariatric Surgery (MCBS policy)

Most patients with BMI > 35 will be considered for bariatric surgery

BMI 30—35 : selected cases. Do the pros outweigh the cons/risks?

Metabolic comorbidities or weight related mobility/joint/pain issues increase the case for surgery.

Outcome: Broadly speaking most patients will lose around two thirds of their excess weight

Accessing Bariatric Surgery

Private—

Insurance for complex procedures (e.g. revisional surgery). Usually top level required

Self pay usually available for lower or intermediate risk procedures

Public—

Key institutions—Box Hill, Austin, Alfred. Expect multi-year waits for first clinic appointment. Referrals may be rejected depending on current hospital policies

Looking for Sessional Rental in the Eastern Suburbs?

Join us in our brand new corner suite on the 13th floor of the new Epworth Eastern tower in Box Hill.

Sweeping views from consulting rooms to the north over Doncaster Hill and the Dandenongs to the east.

For more information call Carol on 03 9958 3000 or email info@melbournecbs.com.au.
