SIRARMS REX RIFLES

HISTORY

SIRARMS ARMOURY entered into the field of barrel and rifle manufacturing in 2004. The success of the manufacturing of highly accurate actions and barrels led to the development of a combination of our own barrel range and sophisticated sniper rifle technology.

The proud result of this combination is **SIRARMS REX** range of extremely accurate, long range rifles with calibers up to 14.5 x 114mm for any tactical, anti-personnel, urban CQB or extreme range and anti-materiel missions.

The SIRARMS design and engineering team profits of the unique advantage of combining hardened military veteran personnel embedded together with a pool of engineers with decades of experience in the most demanding field of Aerospace and F1 industry (**Maserati** plant is located 8 km from our manufacturing facility in Italy).

Our goal has been, since the inception of SIRARMS, to combine UNPARALLED performance with REASONABLE cost and UNCOMPROMISED quality and reliability.

The heart of all **REX RIFLES** is our patented proprietary SIR40 action. The precision fit and space-age tolerances of our components are so that the coupling between the action and the receiver of all our REX RIFLES is possible only via a **cryogenic process**.

Around our action-receiver-barrel assemblies, we have designed a **MODULAR** chassis program capable to answer any mission requirement including the capability to **SWITCH CALIBER** in the field and **SEMIAUTO** select fire capability on the same platform (T-REX model).

PRODUCT LINE

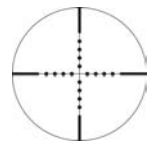

The **REX Rifles** product line is articulated around different mods focused on the mission at hand.

J-REX

The **J-REX** rifle configuration features a Kevlar adjustable stock internally reinforced with an aluminum frame to provide rigidity to the assembly. Our technical team is well aware of the importance of a chassis/frame capable to adsorb the energy and vibrations generated by the discharge of the round, without affecting the internal ballistic of the weapon.

The main applications of the **J-REX** is either Urban CQB and Counter Measure or in any scenario where light weight and maneuverability are paramount.

The **J-REX** is available only in bolt-action configuration.

1/3 MOA @ 300mt
GUARANTEED

CALIBER	SKU	MAG. CAPACITY	OVERALL LENGTH	AVG. WT. (LBS.)	BARREL LENGTH	BARREL MATERIAL	BARREL FINISH	STOCK MATERIAL	STOCK FINISH	TWIST RATE	LENGTH OF PULL	DROP (COMB)	DROP (HEEL)
308 Win	84461	5	45 3/4"	5 to 6.5	20" to 26"	416 Stainless Steel	Black TriNyte	Premium Kevlar Stock	OD Green	10	13 3/8"	1 1/2"	1 1/4"

SIRARMS REX RIFLES

K-REX

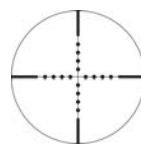

The **K-REX** rifle is based on our superlative SIR40 action married with a McMillan Tactical Rifle Stocks for traditional customers.

Our tactical **K-REX** McMillan series is a combination of benchrest accuracy, battlefield ruggedness, superior ergonomics and specialized design.

The main applications of the **K-REX** are Long Range Tactical missions for those operators that prefer the look and feel of the traditional rifle stock. The accuracy performance is the same across our product line, so we guarantee 1/3 of a MOA @ 300mt! ALWAYS no IF or BUT's.

1/3 MOA @ 300mt
GUARANTEED

SIRARMS REX RIFLES

The SIRARMS ARMOURY design team has developed a variety of caliber variants for the K-REX family:

- ◉ 7.62 x 51mm NATO
- ◉ .300 WINMAG
- ◉ .338 Lapua Mag
- ◉ .300 Norma Mag
- ◉ .300 RUM

... custom calibers could be available upon customer's specifications.

CALIBER	MAG. CAPACITY	OVERALL LENGTH	AVG. WT. (LBS)	BARREL LENGTH	TWIST RATE	STOCK MATERIAL	ACTION /BARREL	FINISHING
7.62 X 51 NATO	10 Rounds	46.5"	9.32 lbs	20 to 26"	1:10"	COMPOSITE	SR40 SHORT AISI 416	CERACOTE
300 WIN MAG	10 Rounds	47.9"	10.72 lbs	20 to 26"	1:10"	COMPOSITE	SR40 SHORT AISI 416	CERACOTE
338 LAPUA MAG.	10 Rounds	49"	11.5 lbs	20 to 26"	1:10"	COMPOSITE	SR40 SHORT AISI 416	CERACOTE

SIRARMS REX RIFLES

T-REX

The T-REX version sits at the technological pinnacle of the SIRARMS REX family and it is beyond the reach of ANY of our competitors. Here's why:

1. Modular design of the T-REX Chassis allows to **switch caliber** on the field providing the operator with unparalleled mission flexibility. The caliber switch is made in a matter of minutes, by switching the upper assembly of the rifle which includes to Barrelled Action. The lower assembly containing the trigger group and stock is common to all calibers configurations.

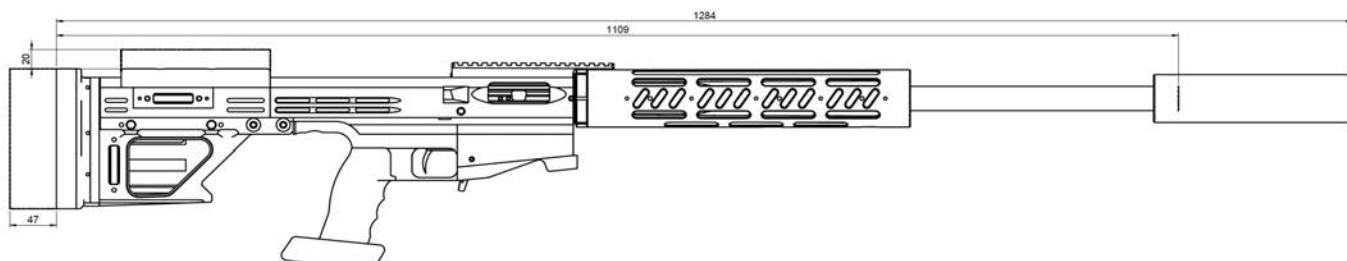

Figure 2 :SIRARMS T-REX/SMA Semiauto

SIRARMS REX RIFLES

2. The **T-REX** is available in **bolt action** configuration or **select fire** (semiauto). THIS IS A FUNCTION NOT AVAILABLE ON ANY OTHER SNIPER PLATFORMS ON THE MARKET!! We are talking of the SAME design/dimensions but TWO different actions. This allows the operator to switch rifle according to the fast changing scenario on the battlefield, maintain its Muscle Memory, no confusion and potentially lethal delay due to different rifle platforms!

3. For example, the operator is scoping a target with his bolt-action **T-REX .338Lapua @ 1400mt** while a target of opportunity presents itself @ 35mt range, all he has to do is drop the .338 Lapua **T-REX/BA** and reach for his Semiauto 6.5mm Creedmor **T-REX/SA** and engage, no waste of time during the transition, both platform are **IDENTICAL** so muscle memory is the same.
4. Biometric design of the chassis is adapted to the human body to provide exceptional comfort end ergonomics.
5. Superlative accuracy achieved by extreme precision in the fitting of the action and receiver by the means of a proprietary **Cryogenic** mating process. Again we GUARANTEE 1/3 MOA grouping @ 300mt. All our competition guarantees 1/3 MOA @ 100mt! This means our rifles are THREE TIMES more accurate!

SIRARMS REX RIFLES

A rifle that adapts into every situation without compromise

T-REX

MISSION SPECIFIC VS. MULTI-ROLE ? Now you do not have to choose! With our **T-REX** rifles you have access to a Mission-Dedicated platform WITH Multi-Role flexibility.

SIRARMS ARMOURY currently fields **T-REX** AMR (anti-material rifles) in two calibers, namely the 12,7x99mm, and the 14,5x114mm.

Other standard calibers available are:

- 7.62 x 51mm NATO
- .300 WINMAG
- .338 Lapua Mag
- .300 Norma Mag
- .300 RUM
- 6.5 Creedmor
- .300 Norma Magnum
- .375 Chey Tac

SIRARMS REX RIFLES

Why Transition to a **SIRARMS** **REX**

Sniper platform ?

Performance

Our patented **Cryogenic** mating of Action and Receiver design guarantees superior Ballistic Performances.

Technology

Our revolutionary BIOMETRIC design approach provides un-paralleled comfort to the operator. The introduction of the more advanced manufacturing and QC technologies allows us to excel in both performance and reliability.

Accuracy

Precision in Manufacturing = Accuracy in the field!
