- 1 Yard Applied 3" thick covers 100 sq ft (10'x10' area)
- 1 Yard Applied 2" thick covers 150 sq ft (15'x10' area)
- 1 Yard Applied 4" thick covers 75 sq ft (15'x5' area)
- Playground Material is recommended to be placed at 9" - 12" thick to help with fall protection.

Do I need to be home for my delivery?

No. Simply tell us where to dump the material when you call in your order or place a tarp or bucket in the area you would like. You may leave a check on the door for payment or we accept all major credit cards.

When and how much mulch should I use?

Generally, the best time to mulch is in the spring to get a good weed barrier down. A 2"-3" top dressing is recommended but a 3"-4" layer is necessary for new areas to aid in moisture retention. We recommend a light mulching in the spring and another light mulching in the fall to protect perennials for the Winter. Provide us with your measurements and we will help you determine how much is needed.
