ABOUT US

What Sets Us Apart

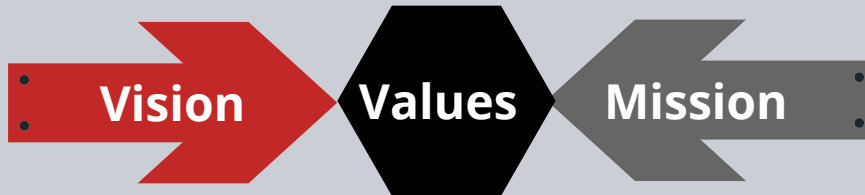

- Our ability & Capability to execute projects from Design to Handover
- Certified Engineers.
- Large pool of technical expertise

WE, Tee dee Technologies, strive for Customer Satisfaction, with a Technology Touch. Tee Dee technologies are part of the well-known TEE DEE Group established in the year 1999. Tee Dee Group has grown organically expanding its portfolio spread across multi segments.

Tee Dee belongs to a Group which primarily promotes trade and commerce through its affiliation with several large multi-national entities. By virtue of its status as agent and partner, the Group provides opportunities to a global network of venture's seeking business opportunities in the region. Further, the Group's extensive knowledge of UAE's industrial and commercial infrastructure as well as in the Middle East at large makes it an ideal business partner offering comprehensive benefits in a wide range of products & services.

1. WHAT WE BELIEVE

We merge **Mission** and **Vision** into our **Values**

To be a responsible organization in 360-degree view, which values human relation and client satisfaction

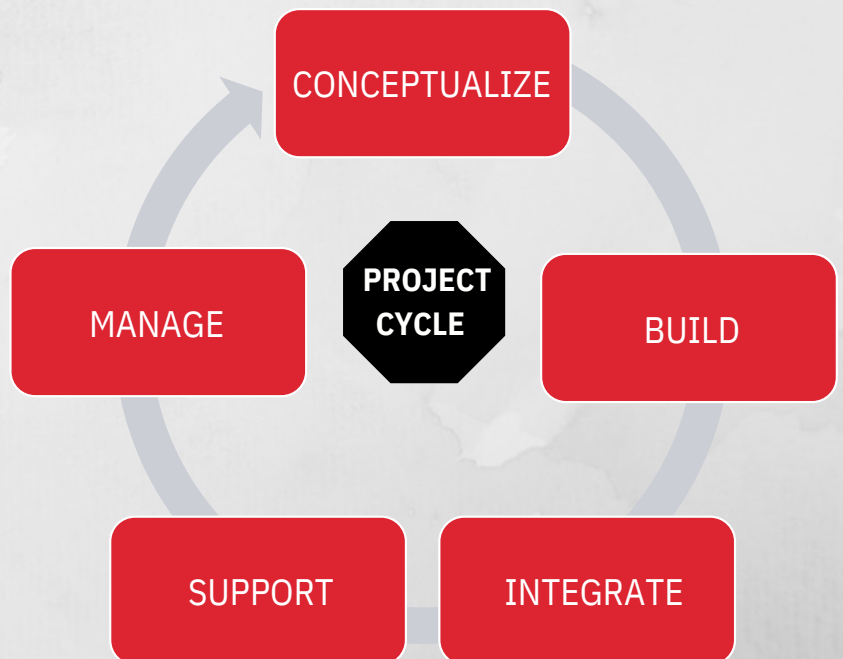

2. HOW WE DO

We conceptualize: the process involving perceiving, developing, and clarifying concepts that the client conceived in his mind.

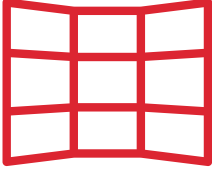

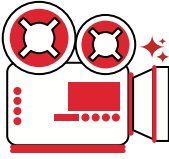

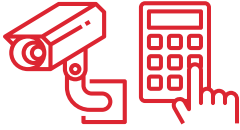

We Build: the stage where we develop the project blueprint within the technical framework.

We integrate: to make sure the seamless integration of different systems involved in the project.

We support: to ensure high availability of the service and resources to enhance client profitability.
We manage: by pro-actively analyze and mitigate the risks, to improve efficiency & productivity.

3. WHAT WE DO

Home Automation		Theatre & Entertainment	
Audio Visual		Video Wall & Digital Signage	
Home Cinema		Meeting & Training Room Solutions:	
Operation & Command Centre:		ELV Systems	
Guest Room Management System		IOT & Automation	
Lighting Control & Building Automation		Wifi & PABX	
EV Charger		3D Printing Consultation	

HOME AUTOMATION

Our Smart Home/Office Automation helps you to provide a fully integrated solution which can control Lighting, Shading, Security System, Audio Video Systems, Alarm Systems and Gate/Garage Control Systems from a single application. Our Integrated Solution helps you to create an intelligent Home with Enhanced Lifestyle Features. We are offering you a Wired and Wireless Solution depends on your choice of Integration. The solution can easily be integrated with Amazon Alexa and Google Home for a complete Voice Guided Control of your Home/office. We are also providing you dedicated Touch panel controls, Mobile Applications and Wall Panel controls as per your choice. Wireless Solutions are suitable for those who wish to convert their already built Home into a fully Automated Home Using RF Solutions

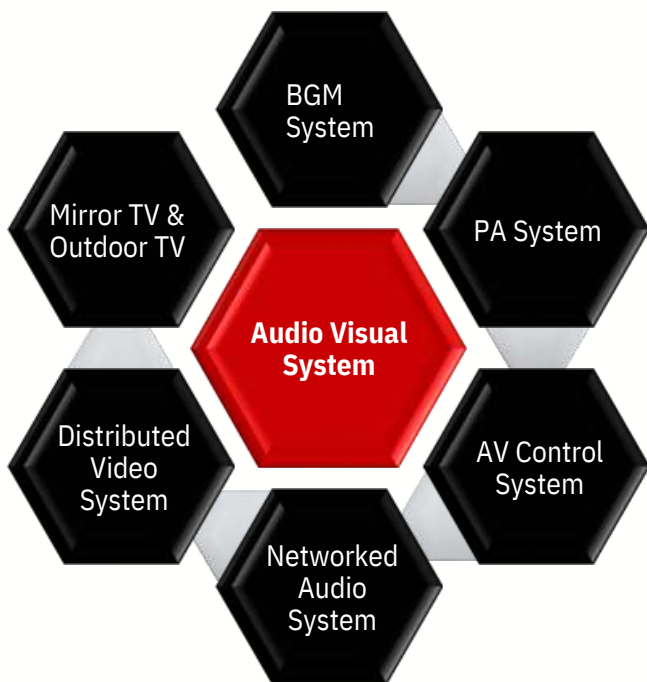

THEATRE & ENTERTAINMENT

Design, implement and manage to seamlessly integrate latest technologies to make your audiences top notch experience. Our design team is trained to build bespoke solutions for convention centre, Schools, Malls etc. We can integrate and collaborate different solutions and system to give a seamless experience.

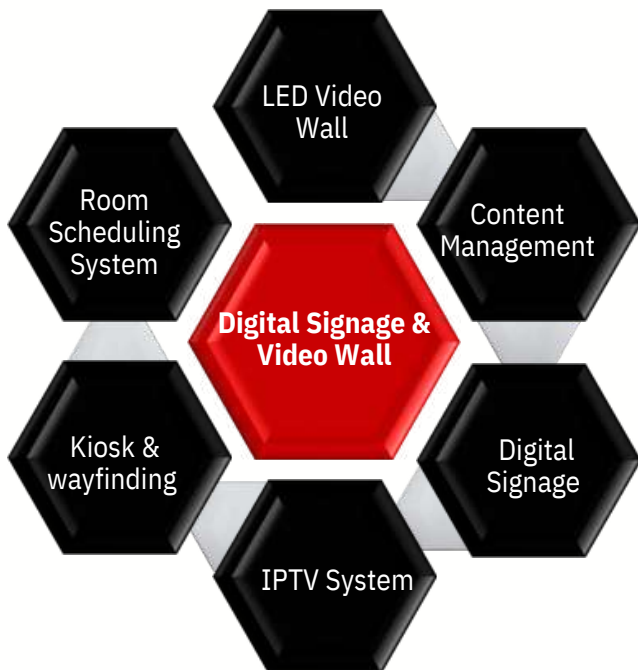

AUDIO VISUAL SYSTEM

Our priorities are to design and deliver systems that are reliable and simple to operate, cost effective in terms of capital outlay and operation and energy-efficient, with the flexibility to accommodate future change and technological advances. In addition to the choice of display sizes, sound systems and operating controls, we provide input on room shape and layout, sightlines, acoustics, bandwidth capacity, lighting and shade control and the interface with safety and security systems, all with the goal of optimizing sometimes conflicting technical, operational, administrative and financial objectives.

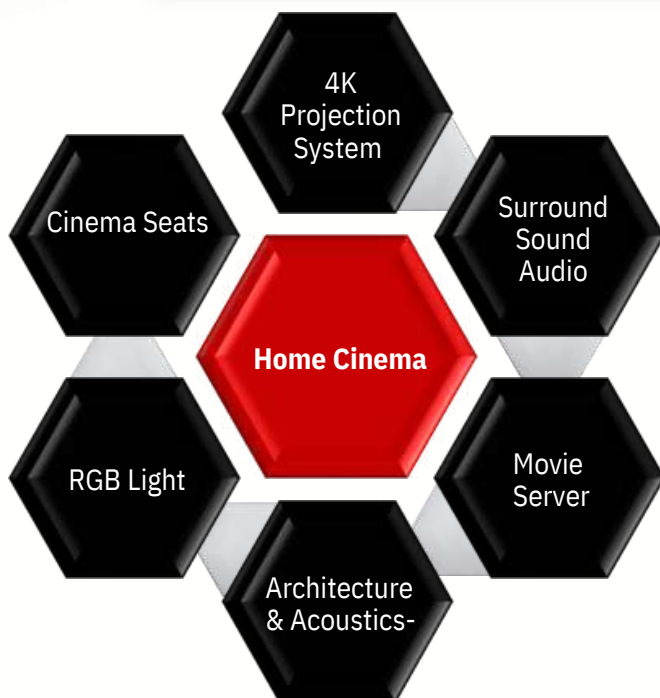

DIGITAL SIGNAGE & VIDEO WALL

Our vibrant digital signage offers a compelling alternative to traditional static solutions, making messages more impactful and bringing stories and creative content to life. Ultra-high-resolution displays and video walls create digital experiences that are dynamic and memorable—captivating audiences with incredible imagery. Whether it's for advertising or entertainment, to relay information, or to inspire brand interaction, the goal of digital signage is to engage target demographics. Vivid display installations provide a powerful way to reach consumers. Through interactive solutions and digital storytelling, organizations can forge deeper and more personal connections.

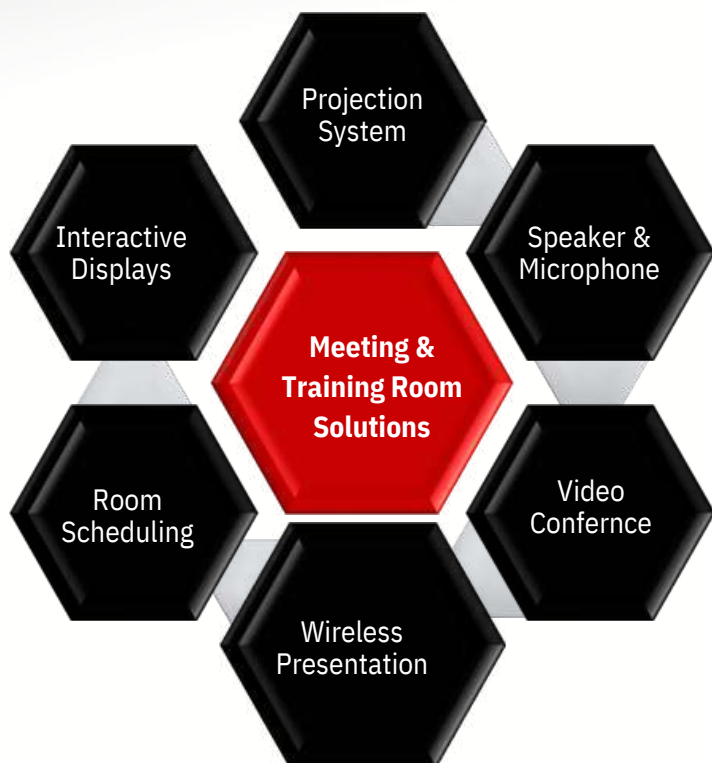

HOME CINEMA

Our home cinemas offer the ultimate entertainment at home to enjoy with your family and friends. Custom designed systems provide you with the perfect multimedia experiences from any source, on any screen type. We will create a unique place for you to enjoy watching movies with your family and friends. The solution shall be unique in all aspects like superior acoustics according to your conditions, lighting and lighting control, climate control, blinds/curtain controls, multimedia system controls. A single touch solution to control all these facilities will make your life easy. We partnered with all leading manufactures in world to provide you quality systems based on your budget.

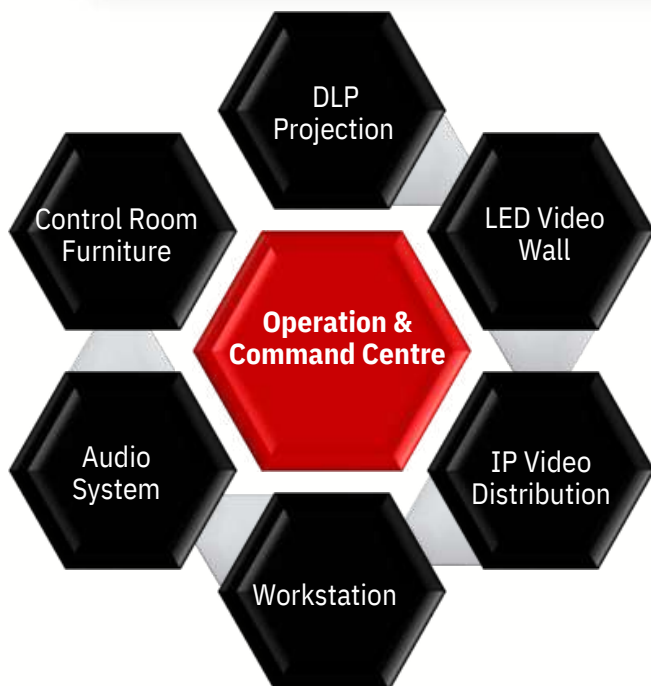

MEETING & TRAINING ROOM SOLUTIONS

The meeting room is the command centre for most businesses. It's a collaborative environment where ideas are discussed between stakeholders near and far, and where key decisions are made. To create a versatile and reliable executive meeting space that suits your particular requirements, our solutions range from a small simple conference room with a projector and conference phone to a large executive conference room with integrated audio, video, displays and control systems

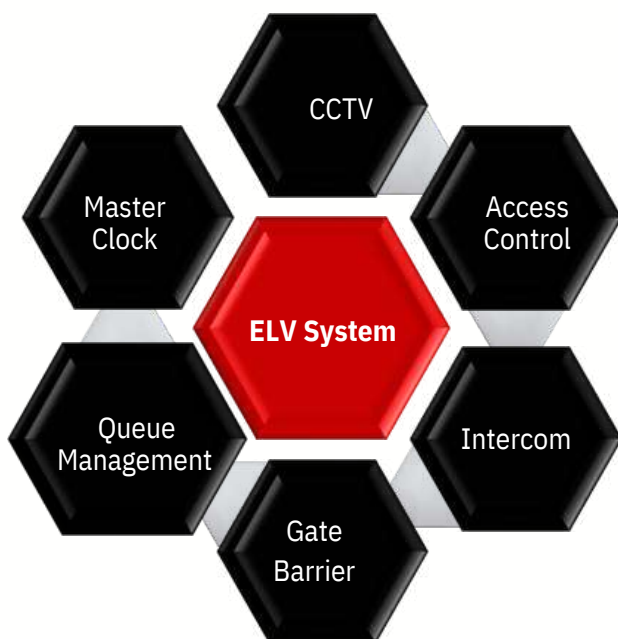

OPERATION & COMMAND CENTRE

The strive to understand and provide solutions for your control room requirements. Beyond delivering technical innovations, our goal is to support you with industry-leading solutions and service to give you complete confidence in your system. With the complexity and unique challenges encountered when setting up a new control room or retrofitting an existing one, we have the flexibility and experience to tackle any size of installation

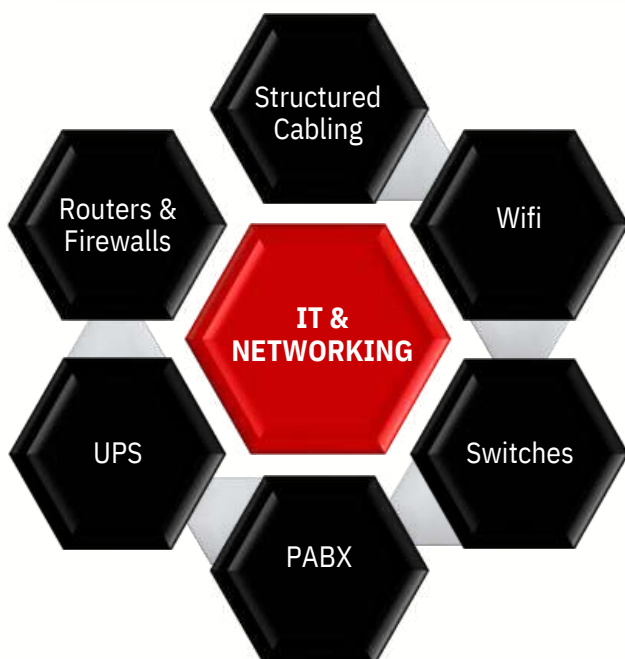

ELV SYSTEM

An effective ELV strategy requires domain expertise, experience obtained from previous installs, and a skillset to design, integrate, and deliver an integrated ELV system that meets diverse needs and while achieving ongoing cost reductions. We take a holistic approach to ELV system design and integration, assuring ELV runs concurrent with and independent of operational power but leveraging existing infrastructure.

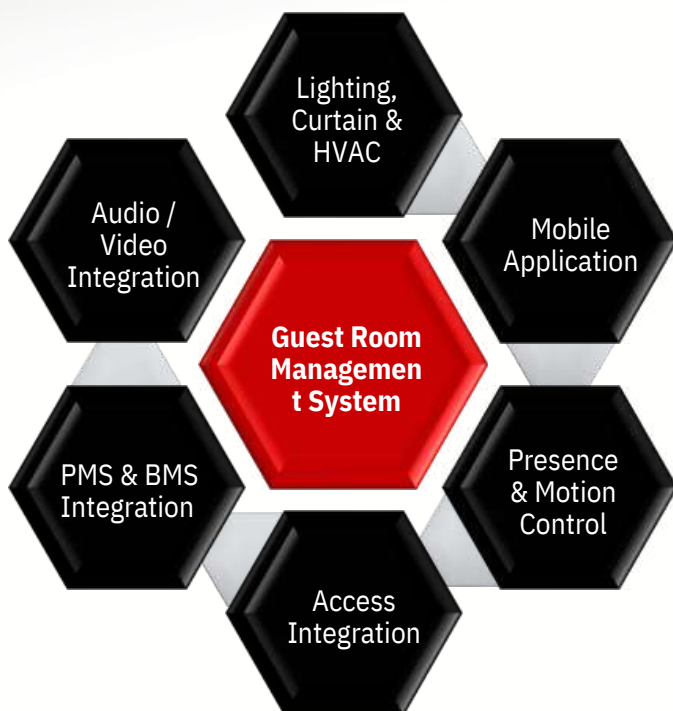

IT & NETWORKING SYSTEM

Our first priority is on consulting with our customers, then recommending effective IT and networking solutions and helping to both implement solutions and provide service and support. Information technology systems are constantly changing and forever evolving. The explosive adoption rate of new technologies requires that businesses have a much more elastic infrastructure to support rapid technology integration. Our team will work with your organization to develop integrated, custom-tailored solutions and proactive management to help solve your business challenges. We provide our clients with efficient and cost-effective solutions.

GUEST ROOM MANAGEMENT SYSTEM

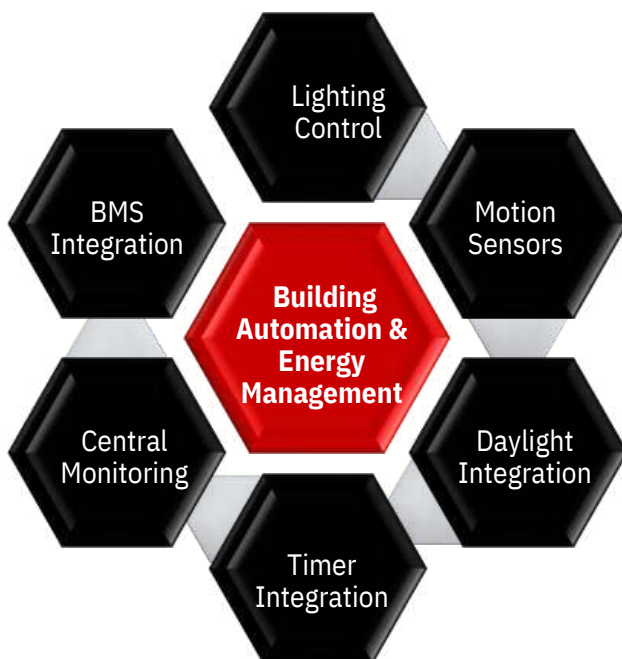

The main objective of using a GRMS - Guest Room Management System is to consistently satisfy guests' needs and expectations in their rooms. Our design can provide an innovative and efficient way to control the lighting, heating/cooling, curtains, TV, Music System, Radio and hotel guest services through intuitive buttons or touch screen/panel interfaces. It enables the hotel to efficiently manage guest room energy consumption and drive their vision of the optimal in-room experience generating greater guest satisfaction. We can ensure customer comfort and provide easy management for hotel operators with automated solutions for guest rooms. The system manages different scenarios in each guest room, including welcome, living and sleeping settings. Lighting, temperature and curtains can be controlled to suit the activity of the occupant. Different scenes can be set in each guest room with the guest room management system. Settings can either be adjusted in the room by the guest or centrally via the hotel management system / Hotel Software / PMS.

IOT-INTERNET OF THINGS

There's a lot of noise at the moment about the Internet of Things (or IoT) and its impact on everything from the way we travel and do our shopping to the way manufacturers keep track of inventory. Devices and objects with built in sensors are connected to an IOT platform, which integrates data from the different devices and applies analytics to share the most valuable information with applications built to address specific needs. The information picked up by connected devices enables to make smart decisions based on the requirement.

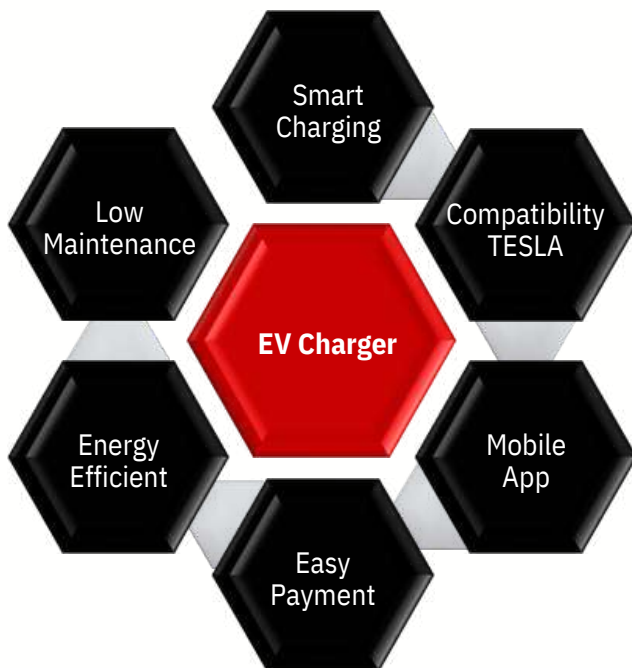

BUILDING AUTOMATION & ENERGY MANAGEMENT

A good lighting design includes a good controls design. Lighting controls play a critical role in lighting systems, enabling users manually or automatically to turn the lights ON and OFF using a switch; and/or adjust light output up and down using a dimmer. Lighting controls are input/output devices and systems. The control system receives information, decides what to do with it, and then adjusts lighting power accordingly. This basic functionality can be used to generate these benefits for the lighting owner, flexibility to satisfy user visual needs; and/or automation to reduce energy costs and improve sustainability.

EV CHARGER

Having in-depth understanding of developing complex Power electronics solutions catering to varied and extreme environmental needs, we are now one of the best EV charging solution providers in the industry.

TEE DEE SERVICES

We not only build and install the system; we will also manage the system. It is essential for a business to have a reliable system in order to obtain high efficiency. We offer clients the design & consultation as part of our service at no cost. Our team will be available to facilitate the design taking the input requirements.
