

SMART PATIENT ENGAGEMENT SOLUTION

SMART PATIENT ENGAGEMENT SOLUTION

Lifestylepanel (LSP) has a dedicated and experienced Healthcare technology team to help you find the right solution to meet the ambitions of your hospital. We work with you to understand how your facility works and how our solutions can improve both your patient satisfaction and efficiency.

- **IMPROVED PATIENT SATISFACTION**

By allowing caregivers to engage patients in a more productive and meaningful way at the bedside, LSPcare solutions ensures patients are informed and satisfied with their care. Hospitals can collect real-time, measurable feedback about satisfaction – allowing them to take immediate action to address concerns and build upon success.

- **REDUCED RE-ADMISSION RATES**

With on-demand access to interactive health education materials and discharge instructions, patients learn how to stay healthy after discharge before they leave the hospital. Hospitals can monitor patient interaction with educational materials to provide supplementary instruction as needed, helping to promote better post-discharge compliance and reduce re-admissions.

- **ENCOURAGE MEANINGFUL ENGAGEMENT**

LSP's technology supports the adoption of patient portals by promoting enrolment at the bedside. Our platforms integrate seamlessly with hospital portals so staff can help patients register and show them how to navigate portal features, increasing the chances that patients will use the portal to view, download or transmit health information after discharge – a crucial element in any strategy to improve outcomes and put patients in control of their health.

POINT-OF-CARE

LSP is a caring and consultative long-term hospital partner. The LSPcare solutions are empowering to healthcare workers, patients, and their families. In addition, it gives the hospital an instant modern facelift.

LSPcare supports the hospital to:
