

ANSWERING
THE CALL

INTRODUCTION

Dominick and Shelley Armato knew that there had to be a better way to do construction. The management of documents is daunting yet mandatory. The more technology that was brought to the project, the bigger the challenge becomes. Accurate information is the real key.

Today's construction projects are too complex for traditional management techniques. Chaos cuts into bottom lines and into your sanity.

The most successful construction management companies rely on software that can provide clear value by improving efficiency and ease of use.

MySmartPlans is a comprehensive software that provides construction owners, architects, engineers, general contractors, and subcontractors the ability to collaborate electronically in real time. The software runs the entire life cycle of a construction project, from planning, to design, to construction, through facilities management for the next 50 years.

Centralize, build, share, organize, archive: that's the better way!

BUILD WITH THE ULTIMATE IN CONSTRUCTION TECHNOLOGY

Must solve problems not create them!

Build 10xs faster

Build with actionable data

Prepared for discovery in litigation

Lower bond rate

FINISH ON TIME

Under Budget No Modifications

- Coordinate collaboration, planning, and information distribution, accelerating every step of the project
- Virtual workroom brings all participants into line, meaning work is done in the most efficient way possible

STAY ON BUDGET

- An investment into your process is an investment into the success of your business
- Projects that take less time due to more efficient communication are more likely to free you from budget concerns

PROJECT INFORMATION MANAGERS (PIM)

Tatum Sr. Project Information Manager

- The PIMs add clarity, format, organization and optimization.
- MySmartPlans is the **ONLY** construction management software that provides you with a PIM.
- Ensure information is complete and accurate.

TRACK (& SEARCH) DOCUMENTS

- All documents are fully searchable
- Say goodbye to meta-tagging
- All files named according to your naming conventions
- Information is smarter, simpler, and easy for all to access and use

SECURITY

- MSP meets the highest security standards
- Numerous levels of security within the dashboard

BIDDING PROCESS

- Bidders register through the ITB public notice or email blast
- Automatically receive synchronized updates
- Documents are searchable and bookmarked
- Cut response times significantly
- Central location of posted answers to bid questions and RFI's

HOLD EVERYONE
ACCOUNTABLE

- Complete transparency
- Prevent backdated and hidden changes
- Individual usage
- Audit trail

CLOSEOUT MODULE

Kansas City
International Airport

- Self-contained and fully customizable
- Viewable for the next 50 years
- Closeout is being built from the very beginning
- Digital Twin Delivery

EASE OF USE

- Easy to use dashboard
- Entire team receives support
- Comprehensive, responsive and integrated software
- Fully tailored to your project needs

CUSTOMIZATION

- Technology that is customized to you
- Make changes quickly, Gate Keeper Delivered actionable data
- Continually works with you

Smart Rooms

MySmartPlans was essential to the success of KCI Mega project. The interest cost on \$500m of construction financing was significant- each day made A difference. Any alternative strategy to build with clean data would result in data disasters. than MySmartPlans. The MySmartPlans solution – their people and technology – worked well.
