

HOW IT WORKS

TiCoat is a TiO_2 Photocatalyst that uses light, oxygen and water in the air to clean and deodorize contaminants that touch its surface.

WHAT IS TICOAT

ONE TIME LONG - LASTING COATING

TiCoat is a clear, long-lasting, fast-acting, self-cleaning surface coating.

NO HARMFUL CHEMICALS

It safely protects surfaces, keeping them cleaner, smelling better, and protecting anything it's applied to.

LOOKS CLEAR ON ANY SURFACE

Can be applied to both fabric and solid surfaces.

ELIMINATE CONSTANT CLEANING

Simply use water and a microfiber cloth to clean treated surfaces.

This product has eliminated our annual cleaners costs by 30%. This has changed our schools for the better.

Patricia Buell
Superintendent - Brooklyn, CT.

It's not what I smell. It's what I don't smell.
