

Datavault for Politics

There are many ways we can help your candidate maximize campaign donations

- Significantly broader your your candidates reach using Datavault® offers your campaign Patented NFT and Blockchain technology.
- Set up a campaign within 72 hours
- There is no cost to the campaign
- Campaigns are run securely using our multi-layered, cybersecurity, identify verification and privacy solutions

Campaign Manager:

- Promote your candidate using NFTs and digital tokens to drive campaign contributions
- Leverage the Datavault® Web 3.0 technology to reach a younger constituency

PAC:

- Raise funds for your interests using NFTs and digital tokens
- Communicate with current and future supporters and donors

Buy and Sell Campaign Data Using the Information Data Exchange®

- Purchase data to inform your campaign
- Sell your valuable campaign data for cash

Use Case:

- An NFT is priced at \$10.00 and is provided by DataVault to a campaign committee.
- The NFT is offered by the campaign committee to contributors who make a \$10.00 contribution.
- Once the campaign committee collects a contribution connected with the NFT, it records the \$10.00 contribution and pays DataVault a fee of \$3.00 as a usual and normal fundraising expenditure."

- Datavault® is collaborating with the FEC to insure all campaign finance rules and laws are followed
