OPERATING UNDER A CLOUD?

Focal image

THERE'S A SILVER LINING

REDUCING COSTS

MIGRATION

WORK WITH US

DID THE PROMISE OF CLOUD COMPUTING HAPPEN FOR YOU?

We didn't think so! You're not alone. There are many companies just like you who believed in the promise of cloud computing but are now shackled by it.

But there is a silver lining, which is that CDG have built a business around helping companies improve their cloud efficiencies, reduce costs and simplify their operations as a result.

It can be summarised in three promises CDG makes to every client or partner:

1. You can reduce cloud costs, without needing to move supplier
2. You can migrate from one cloud to another more easily
3. You can simplify your cloud management and choose your favoured provider

If you already know or want to talk to us just call **01344 952 705** or

KNOWLEDGEABLE INDEPENDENT ADVICE MATTERS

Traditionally, the balance of power lies with your host, who has no interest in you moving to another platform. It may also be that your cloud supplier is a linked to your IT firm, developer or even staff preferences - and in some cases they will specialise in only one of these suppliers.

It's time to break free. CDG equips companies, resellers and consultants with the power to choose, to negotiate, to move. We can do this for you.

MAKE YOUR CLOUD COSTS EVAPORATE

As cloud costs continue to escalate, and as you suddenly hit new tiers of spend, you may feel helpless in the face of rising costs.

However, even taking the cost of moving into account, CDG has estimated the average client will save 20% of spend on their cloud by using us to find the best solution and help you to move there.

SEE CASE STUDIES

This would then got to a page with at least 2-3 illustrations of cost savings in there

LET'S GET STARTED

If you would like to speak to a friendly and helpful member of our team, ask questions, discuss option or to help with anything on your mind, please get in touch.

YOUR CLOUD FORECAST 'STORMY'?
WELCOME TO THE STORMCHASERS!

Focal image

WHAT NEXT?

MOVE TO CLOUD

MIGRATE

OPTIMISE

IS YOUR CLOUD MEETING YOUR EXPECTATIONS?

If you are like most business, it's difficult to answer this with an emphatic 'Yes'.

It is fair to say that cloud computing has made all our lives easier by removing the need to buy hosting, load balance, migrate servers and double down on security, but it is also true to say that it is not all that it's cracked up to be.

If you are like many of the businesses we speak to, you will have one or more of these challenges:

- What started off as a neat solution has become increasingly **complicated**
- Your **costs** have been mounting and you're not sure why
- You have a number of instances, possibly more than one supplier and it's hard to **keep on top**
- You would like to **migrate** to another supplier, but are concerned about the consequences
- You want to launch a new solution, and want to **compare** cloud options

Which is where CDG comes in. We are experienced in helping a wide number of Corporate and SMEs manage their cloud solutions better.

You can get on top of costs and performance, compare and contrast alternatives, simplify your approach and finally get the end cloud solution you thought that you were buying in the first place.

So, whatever your challenge, CDG are here to help.
