

Designer BRIEF

Intro NPLabs

NPLabs International Compounding Pharmacy: The Right Choice

The right choice for you and your Patients.

We believe every person in the world should have access to the best possible health care, which is why we offer a full range of pharmaceuticals at our compounding pharmacy. We know that each person is unique and deserves personalized care—that's why we work with you to create a solution that works for your patient's specific needs. Our pharmacists will work with you to understand your goals and provide a customized plan that will help you reach them.

We know what it's like being a doctor today: You have so many responsibilities, so many patients who need your attention... and so many medications that don't always work!

We know that as a doctor, you have a lot on your plate—and sometimes it can feel like there's no time left in the day to get things done. That's why we work with you directly to develop customized solutions that meet your needs and help you get more done. Whether you need a new drug or an injectable for one of your patients, we're here for you.

Whether you're looking for something simple or something more complex, we're here to help make sure that everything gets done on time and according to your specifications—and at reasonable prices

That's why we created this brochure: To make sure you know about all of the ways we can help.

About NPLabs

NP Labs has been practicing functional medicine for 16 years, offering customized medicine & well-being to 10,000+ customers in more than 30 countries around the world.

- Strictly high-quality pharmaceutical ingredients
- Low prices & price match
- Fast turnaround & delivery
- Excellent customer service
- Online platform for free & easy prescription transfer
- Consultation with an expert pharmacist
- State-of-art compounding pharmacy

Services

Our services for physicians include:

- Customized formulations for all your patient's needs
- Personalized solutions based on your patient's unique needs
- Expert advice on how to use our formulations effectively
- We are constantly looking at new technologies and products that can help us create customized solutions for you and your patients. Our goal is to make sure every patient gets the right medication at the right time in an easy-to-administer form.
- Our compounding pharmacy uses only the highest quality ingredients, so you don't have to worry about your patients getting a product that won't work as well as it should or having an adverse reaction to it. We know how important it is that your patients feel comfortable with their treatment plan, so we do everything we can to make sure they're getting what they need.
- When you need a prescription, you need it now. That's why we're here—we can get your medicines to you in as little as a few hours.
- Our compounding pharmacy is equipped with the most advanced technology available to ensure that your medicines are always safe and effective. Our team of pharmacists has decades of experience in compounding medications, and they work closely with doctors to make sure that our formulations are tailored specifically to your patient's needs.

Quality

Quality Matters More Than Anything

Since day 1, the quality of compounded medications has been our No.1 priority. We apply the highest standards of quality and safety and we inspect and control every stage of the production, from the moment we receive the prescription until it is delivered to the patient.

Extensive Testing Protocols

- Continuous tests-both in house and third party- to guarantee the potency, efficacy, and quality of our products. We are one of the only pharmacies in the world to have our own HPLC and Mass Spectrometry capabilities!
- Test the quality of all bulk medication materials to assure that they are the best available.

Certified Team

- Our team at NPLabs consists of excellent and certified experts, each one in their field. We apply our team to special training programs such as USP 797, USP 800, media fill testing, garbing practices, cleaning and disinfection, and antiseptic practices, etc. that continue throughout the years in order to ensure that we are all up-to-date with the latest standards and practices.
