graphics

Track Energy usage  
and run time

Access Live data 24/7 from  
any tablet or PC.

## INDUSTRIAL CONTROLS SYSTEMS

# Get a tool you need to cut downtime, extend asset life, and more — organized, accessible, and connected.

Tate's Industrial Control Systems (ICS) is an invaluable tool that helps support a facility's operations to make them more effective. The combination of data reporting and web-based mobility helps streamline facility operations while allowing plant operators to make informed decisions.

ICS will offer your facility total peace of mind by minimizing unscheduled downtime, maintaining operational safety, and optimizing equipment performance – win, win and win!

## The Tate's Industrial Control Systems delivers:

### Tailored programs

We tailor our industrial control systems to your facility's specific equipment demands.

### From anywhere, any time

100% Cloud Based so you can access your information anywhere from the palm of your hands

### Factory-trained technicians

Our factory-trained field engineers know their way around all the leading brands of facility equipment.

### Customer Support

Our customers enjoy preferential scheduling — and a guaranteed 4-hour 24/7/365 response in an emergency.

### Observe & Optimize

Easily see and manage all equipment information in one place.

### Custom Dashboards

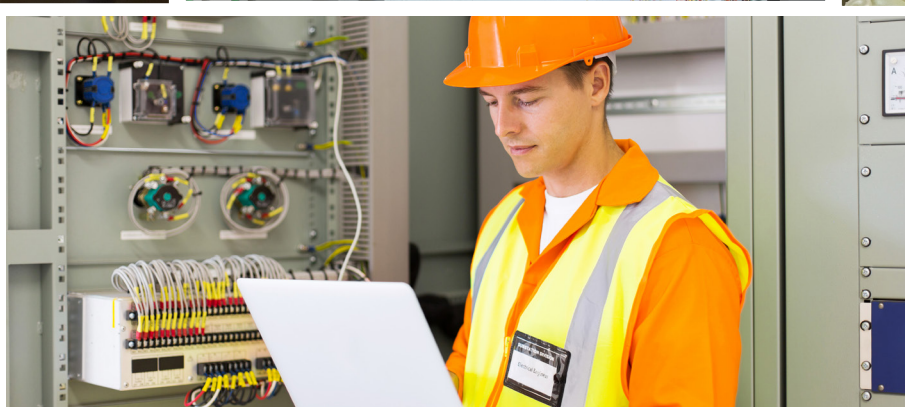

Custom dashboards that align with your maintenance requirements.
