Advanced Rigger
Custom Programs

Safe and effective training for the crane and rigging field.

Programs consist of extensive classroom instruction, audio visual aids, challenging workshops and real world applications.

Hands on training is available using your cranes or ours.

Forklift Operator Training covers Variable Reach and Counterbalance Rough Terrain Forklifts with a thorough comprehensive hands on evaluation.

Mobile Elevated Work Platform Operator Training stresses not only operation, safety, regulatory and inspection requirements but also updates on new equipment and updates that your life might depend on (literally). This course includes classroom and hands on in one day.

Crane Operator Qualification consists of 1 or 2 days of classroom training by certified operators using a wealth of training resources and reference materials. Includes 1 day of hands on practice and practical exams.

Other professional services - We can provide Crane Inspections, Lift Plan Reviews, quality on-site safety audits, and consultations in the crane and rigging arena. Let our combined experience of over 64 years benefit you and help your business be safe and successful.

We offer Basic, Intermediate and Advanced Rigger and Signalperson training. Our courses can be tailored to your business or industry. We cover all OSHA and ASME standards as well as industry best practices.
