Samples & Thoughts & Preferences:

1. We were offered the following basic design by the print company, but did not like it as it is only logo + print on red background, we are looking for a more sophisticated/layered design (although we like the idea of a red box)

2. The following is a more sophisticated and layered design, but quite heavy, not very legible as there is lots going on and quite hard to follow. We need to go a bit more simpler without compromising a modern sleek look.

3. Some other references we shared with designers so far:

Simple but great color combination of red, black, white and some yellow ↓

Don't like the colors on this one, but again it's a simple, legible and neat looking design ↓

Good looking, cool design sample ↓
