INTRODUCING SMART STACK & JANGO

The On-Site Document Storage Solution

Smart Stack is the most space efficient, modular, accessible and hardwearing on-site archiving system available. Paired with our powerful web based software, we guarantee you'll be finding your documents quicker than Jango fetches a ball!

HOW IT STACKS UP

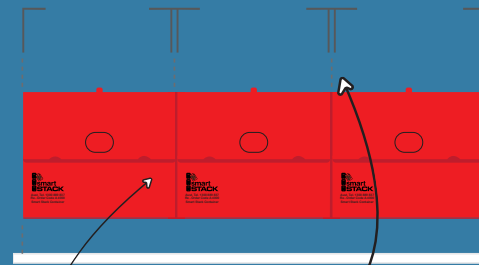

0.1

0.1 LIGHTWEIGHT INNER FILE CONTAINERS

Purpose built for A4/Foolscap documents, 'inners' can efficiently store 750 pieces of paper. The ergonomic shape and size make them easy to handle, and mean that you never lift more than 5kg!

0.2

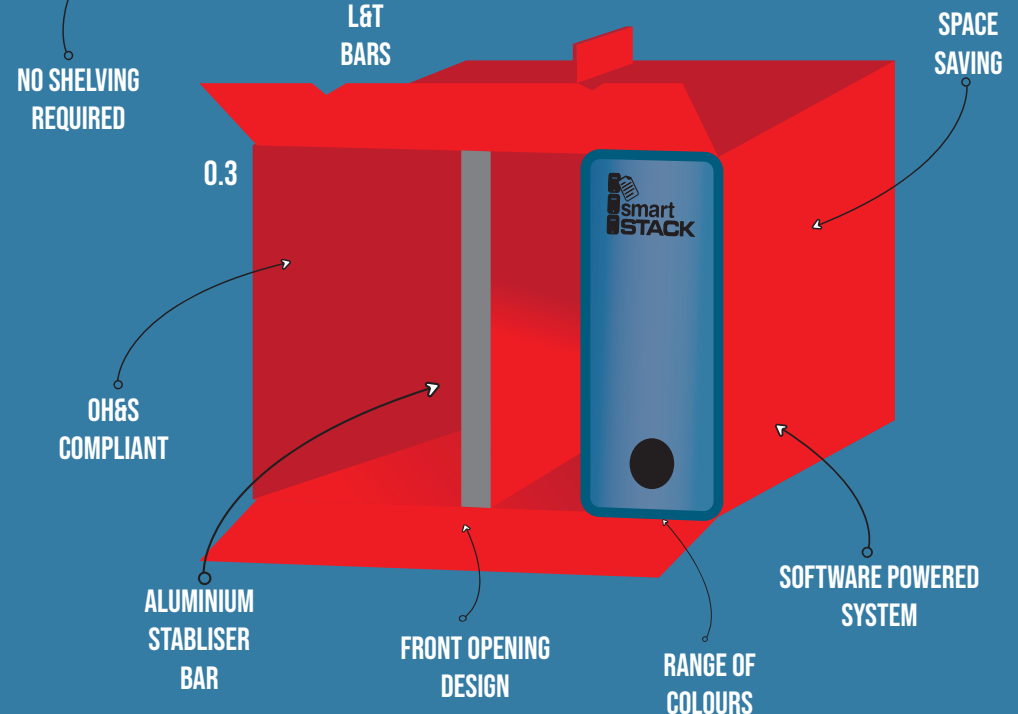

0.2 SELF SUPPORTING STABILISER EQUIPMENT

This system was created with safety in mind. A polystyrene base keeps the system sturdy, while aluminium stabilisers and L&T bars provide the rigidity needed to hold the weight of your archives.

0.3 REINFORCED OUTER SHELL

You'll see these bright coloured boxes first. Made of strong polypropylene, these outer shells protect your important documents held inside.

SOFTWARE POWERED SYSTEM

Access your records anywhere, anytime with our powerful web based software. Features include built in destruction schedules, enterprise grade security and easy data capture with the ability to customise to your organisation's needs.

ENTERPRISE GRADE SECURITY INBUILT DESTRUCTION SCHEDULES EASILY SEARCH DOCUMENTS

POWERFUL SEARCHES

Easily locate your documents in seconds. Find anything using a combination of search words with filters and sorting across all captured data.

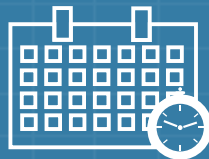

BORROW DOCUMENTS

For temporary access to a document use the borrow feature. The system tracks who has the file so you will never lose a document.

INBUILT DESTRUCTION SCHEDULES

Our software tells you when your documents should be destroyed in line with your relevant record keeping guidelines - no more confusing or outdated schedules!

FINE GRAIN SECURITY

Top grade data security for your peace of mind. Assign security access levels for staff to provide total control over your archives.

MULTI USER

Ensure your entire team have access to the documents they need. There's no limit to the number of users you can add to the system.

AUDIT LOGGING

From login to logout, a user's every move can be tracked with finite detail ensuring that a complete audit history is accessible.

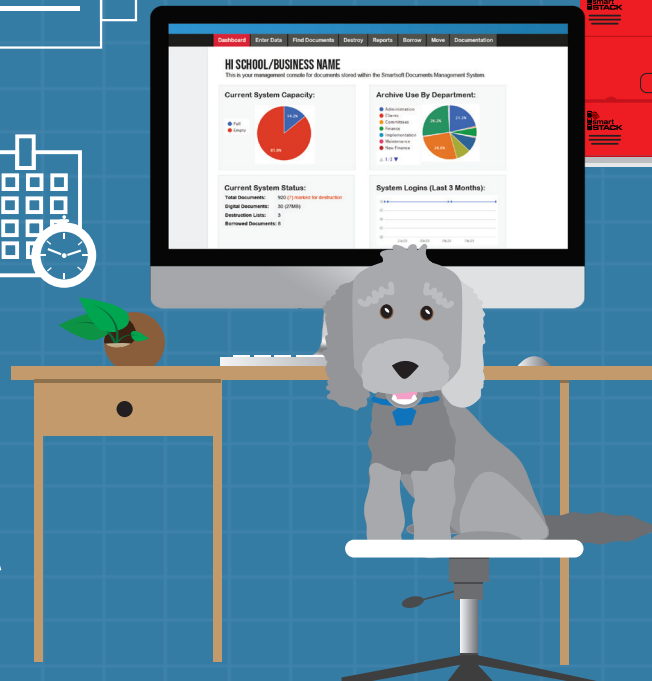

CUSTOMISABLE

Our software is flexible enough to accommodate the needs of any organisation.

MANAGE ON-SITE AND OFF-SITE

Our software can manage both your on-site and off-site archives. We also provide an off-site storage solution for clients in Victoria.

OUR SERVICES

The SMART Team are here to help with every step of your archiving journey, with a range of services to suit your needs.

INSTALLATIONS AND RELOCATIONS

Leave the heavy lifting to us! The Smart team can hand assemble your new on-site archiving system to professional standards with ease. And if you need to relocate your system for any reason we can come to you and make the move for you.

DIGITISATION

With a capacity in excess of 80,000 pages per day we can quickly and cost effectively convert your paper files into digital documents. Easily access your files from our online platform, or have them transferred seamlessly into your own system.

ARCHIVING CLEANUP

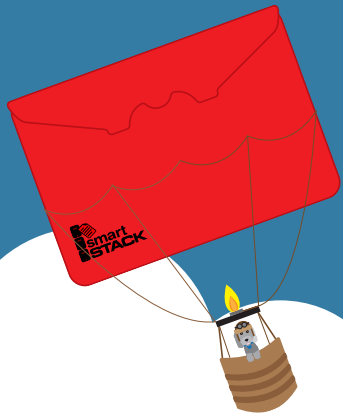

Overwhelmed by the number of documents in your office or school? We offer a comprehensive archival clean up service including sorting, culling and indexing of your files. We can transfer all your files to our Smart Stack system, our secure off-site facility or clean up your system to your requirements including on-site destruction.

DOCUMENT DESTRUCTION

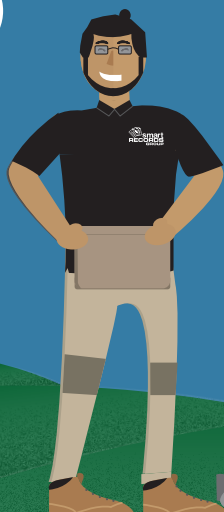

It is vital you protect the personal data of your staff, customers & clients. We can assist you in ensuring your private and confidential documents are securely shredded. With the option of on-site destruction bins and destruction file pickup – we have an option to suit you.

10 YEAR SATISFACTION GUARANTEE

For added peace of mind, we offer a 10-year guarantee on all of our PAT tested systems when installed by our team of dedicated professionals. Find out more at www.smartstack.com.au
