Spot LED crystal

Spot light connector

Straight connector

A straight connector assembly consisting of a black metal plate with two threaded holes. Two silver-colored threaded rods are inserted through the plate. Each rod has a white plastic connector at one end, which has a T-shaped cross-section for interlocking with other components.

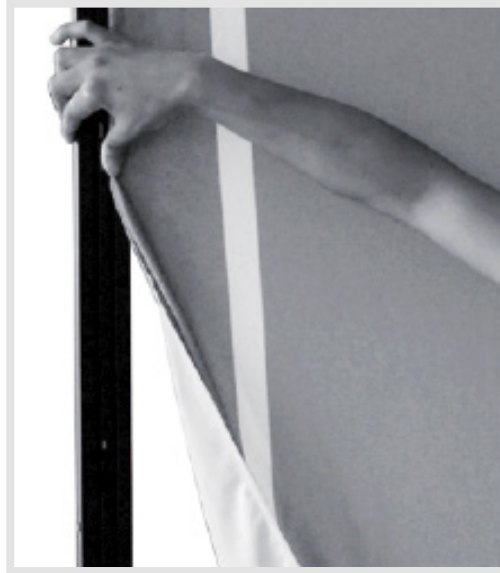

Corner connector L

A corner connector L assembly featuring a black L-shaped metal bracket. Two silver-colored threaded rods are attached to the ends of the bracket. Each rod is terminated with a white plastic connector, allowing for a 90-degree turn in the structure.

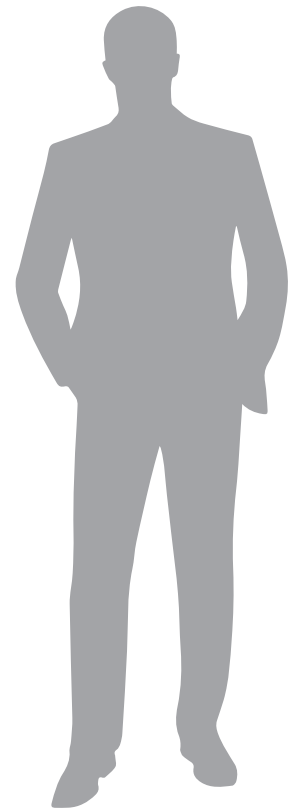

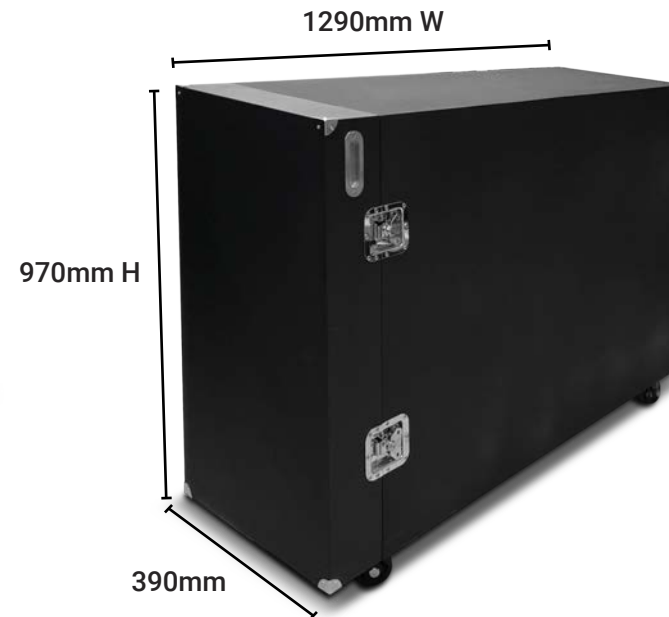

Back to front connector

A back to front connector assembly made of a black metal plate with two threaded holes. Two silver-colored threaded rods are attached to the plate. Each rod has a white plastic connector at its end, designed to facilitate a transition from the back of a structure to the front.

Fabric prints

**Heavy duty
Wheeled case.**
Easy to transport.
