

The header is the same as the homepage and does not need to be included in the design.

**There are two main sections on this page:**

- **Our Story**
- **Our Values**

These two sections should be separated by a graphics element, such as a wave shape such as one suggested (but not exactly the same) as the wave shape in blue on the homepage.

Our company has been through three distinct periods that we would like to see represented by a cool timeline with three segments:

- An initial period focused on business growth strategy.
- A period during Covid when we rethought our business and delivery model
- The current period, from 2022 on, when we built out the capabilities we needed and delivered for our customers.

Our values are central to everything we do. We would like to see our values represented both in text and in illustrations (whether it's a stock photo or an illustration).

**The designer is encouraged to use creativity in how these values are displayed.**

**The text for both the timeline and our values is included in the Word document attached.**

The footer is the same as the homepage and does not need to be included in the final design.
