

ABOUT US

Rapid Recovery opened in Shreveport, Louisiana in 2017 and was soon drawing patients from across Louisiana, Arkansas, and Texas.

The vision of our owners (Bob and Rachel) has always been to provide safe, quality IV treatment in an inviting environment that doesn't carry the stigma of a medical facility.

There's no waiting in a crowded lobby, no one next to you with a broken arm or violent cough, and no surprise bill will come.

That doesn't mean you aren't getting excellent care. Our Medical Director is always available for consultation, and our nurses all have a minimum of five years extensive IV experience.

The goal has always been to help you Feel Better Faster. If you can do that while sitting in a leather recliner, sipping a fruit juice, watching television, and relaxing while you're being treated, we say "all the better".

Give us an hour, and we'll get you back on your game.

**Call 855.435.8437 to book a Housecall
or Afterhours appointment,**

IV Packages

The Essential - A full liter of Ringer's Lactate, a balanced fluid perfect for simple dehydration and exhaustion.

The Lagniappe - "A little something extra". A liter of Ringer's Lactate infused with Magnesium, Thiamine, Folic Acid, and a powerful multi-vitamin. When you need "a little more" than fluids.

The Rockstar - Everything above plus a strong pain reliever, an anti-nausea med, and 30 minutes of medical oxygen. If this doesn't end your hangover, you need to stop going out.

The Gastro Package - Replaces the fluids and nutrients you've lost, stops the nausea, and keeps you from losing any more lunch.

Migraine Relief - Puts a quick stop to your pain. A cool, quiet room, a comfy lounger, and an IV with a pain reliever, muscle tension relieving magnesium, medical oxygen and other vasodilators.

The Game Changer - Contains a proprietary blend of amino acids (OAC) which boosts metabolism before, and promotes muscle-healing after, intense physical activity.
