

This is what mine was looking like. I'm a total amateur playing in Canva Pro

i was working with these ships That I colored in using Snag It. I had to have the squiggles underneath the boats because they were uneven.

These are the original graphics from Canva.

my last attempt last night was to build up the bottoms. I used an app called PicsArt. Totally guessing at the back of the Bda ship.

At 5AM this morning I decided that I needed to stop trying to do this myself. And I signed up for DesignCrowd. I hope you can help! Let me know if you need anything from me to help. Thanks!!! Caroline
