INDUSTRIES

Power & Rubber Supply

Since our inception in 1976, **Power & Rubber Supply (PRS)** has grown to serve as a leading material-handling partner for customers throughout Alabama, Mississippi, Georgia, Tennessee and the Florida Panhandle. From steel and sawmills to paper plants, mining and OEMs, you can count on our expertise, the products we carry and the services we have to keep your operation moving with optimum performance.

PRS is headquartered in Tuscaloosa, Alabama, with locations in Alabaster and Mobile for better customer convenience. Our headquarters features 85,000 square feet of warehousing, showroom and repair shop areas.

PRS is highly responsive and geared for customer-centric excellence. If you run into trouble, we respond 24/7. PRS maintains an incredible inventory of components from three locations. Our goal is to be the first call you make for repairs, installations and expert advice. Our team works hard to keep you as a lifelong partner.

WE WORK WITH YOU

PRS maintains a massive inventory of materials, parts and conveyor components. We represent the most reliable brands in the world. We work closely with the manufacturers you count on and have a depth of experience with each and every product we sell. As industry innovations launch, you can count on us to have the knowledge needed to make crucial decisions that help protect your bottom line—all at a competitive price!

Custom Fabricated Belts

We can construct an array of weigh feeder and specialty belts. Our various fabrication capabilities allow us to create each belt specific for your application.

- Fully Vulcanized Sidewall & Cleats
- Endless Belts
- Bottom V-Guided Belts
- Flange Belts

Precision Waterjet Cutting

Our Waterjet machine produces consistent precision cut parts that are burr-free with no heat affected zones (HAZ) or change in material properties.

What can we cut?

- | | | |
|--------------------------|-------------------|-----------------|
| • Aluminum | • Stone & Tile | • Rubber |
| • Stainless Steel | • Glass & Acrylic | • Laminates |
| • Carbon & Alloy Steel | • Plastics | • Wood |
| • Copper, Brass & Bronze | • Composites | • Foam, Leather |

- Materials from 0.005" up to 12" thick
- Cutting tolerances as close as +/-0.003"

Conveyor Division

- 24 Hour Onsite Belt Installation & Repair
- 24 Hour Onsite Belt Vulcanizing, Mechanical Fastener & Bucket Installation
- Fabricate & Build Specialty Products
- Massive Inventory of Components
- In Shop & Onsite Pulley Re-Lagging
- In Shop V-Guide Vulcanizing
- In Shop Cleat & Sidewall Vulcanizing
- Bucket Installation
- Idler Installation

***We keep over
250,000 feet
of belt in stock!***

DUST SUPPRESSION & COLLECTION

Superior Product Performance

Dust Suppression and Collection Systems provide low-maintenance, cost-effective, reliable solutions to combat fugitive dust.

Without Suppression

With Suppression

IDLERS

Drop & Slide Out®

Drop & Slide Out Idler can be completely dismantled, inspected, and serviced by one person from one side of the conveyor.

Drop & Slide Out Idler Patent Pending

CLEAN SWEEP AC

Pluggage Problem Solver

Removes material accumulation before pluggage can occur.

BENETECH®

SAFE MATERIAL HANDLING SOLUTIONS

MAXZONE® SERIES

Load Zone & Containment

MaxZone Modular Skirtboard and Belt Support System with patented XN Externally Adjusted Internal Wear Liner®, seals the load zone to reduce airborne and fugitive dust, preventing product loss and spillage while improving material flow.

MaxZone Plus U.S. Patent No. 11,273,994
XN Liner U.S. Patent No. 8,800,756

INSPECTION DOORS

Proven Technology

Easy to install and allows for full access to maintenance with a dust-tight seal.

Continental
The Future in Motion

ContiClean® Non-Stick Belt

STOP MESSING AROUND

Keeping material from sticking to belts is vital to keeping your operation profitable. Continental ContiClean® is your non-stick solution. Offering superior material release for everything from silica to iron ore, ContiClean® helps increase your productivity while reducing operational costs.

Simplify maintenance without the added costs

Downtime and equipment failures are a plant manager's worst-case scenario. When operating costs are on the line, you need lubricants that will keep your plant running.

That's why so many trust their equipment with Schaeffer's Specialized Lubricants.

Using advanced additives and base oils, our lubricants provide solid protection against friction and wear. By reducing friction, components last longer so you can maintain output. Schaeffer's lubricants help you control costs by keeping equipment productive and cutting energy usage.

Put our lubricants to the test, and you'll see what others already know. Equipment runs more smoothly and at peak efficiency with Schaeffer's Specialized Lubricants.

NTN's SPAW/SPW Units Are Best-In-Class

**Premium features. Better
performance. Longer life.**

NTN SPAW/SPW units offer superior performance and bearing life as a result of premium features such as:

- SAF/SNL dimensional interchange
- Installs 60% faster than SAF/SNL units
- Ductile housing with optional cast end covers
- Spring-loaded heavy contact lip seal
- Phosphate coated ULTAGE® bearing insert & adapter assembly

To learn more about SPAW/SPW heavy-duty bearing units, contact your NTN Sales Representative, visit NTNamericas.com, or call 1.800.323.2358.
