

PANTONE® Super Chips

Use Super Chips for communicating, sharing, and approving the color intent of your color palettes or brand colors. Visit pantone.com/facts-about-on-demand-prints to learn more.

Color changes based on the printing process and substrate type. Pantone Super Chips are created using digital process-color printers and may vary from the Pantone offset spot-color guides and chip books. Consult current PANTONE Solid Color Publications for master color reference.
