Significant Risk Solutions stands out because:

Customised

We work closely with our clients to develop customised training programs that meet their specific needs.

We understand that every workplace is unique, and we strive to provide tailored solutions that address the specific safety risks faced by our clients.

Experienced

Our team of safety and training professionals has extensive experience in a wide range of industries. We bring a wealth of knowledge and expertise to every engagement, ensuring that our clients receive the best possible guidance and training.

Innovative

We use innovative training methods to deliver our safety training programs. Our programs are designed to be engaging, interactive, & memorable, ensuring learners retain information.

Cost-Effective

We offer cost-effective safety training solutions that help our clients to achieve their safety goals without breaking the bank.

2 Safety Consulting

We specialise in providing comprehensive safety services to help organisations identify and mitigate workplace hazards and risks. Our team of experts is well-versed in State and Territory health and safety regulations, environmental regulations, and industry standards.

Our consulting services include:

Risk assessments

We can conduct thorough assessments of all aspects of workplace health and safety management, from corporate and strategic, through to operational risk.

Management systems

We ensure that our clients are meeting all applicable industry standards and regulatory requirements and benchmark safety management systems against AUS/NZ and international Standards.

Compliance gap analysis

We identify areas where current safety control measures fall short and provide recommendations for improvement and corrective action strategies.

We work closely with our clients to develop corrective action plans and provide ongoing support to help them implement changes and improve their safety performance over time.

Workers compensation

We can identify injury management strategies, review case management plans and can assist with workers compensation premium reviews.

Incident investigation

We help clients understand and learn from incidents that have occurred. Our team are trained in ICAM and Taproot incident cause analysis methodologies to support our clients with performing post incident investigations and develop lessons learned reports.

Safety documentation

We offer customised safety documentation, ranging from project or company safety management systems, plans, policies, procedures, work instructions, SWMS, JHA's and risk assessments.

Our approach is tailored to meet the unique needs of each client, ensuring that documents are practical and effective.

3

Safety Services

We offer a comprehensive range of safety services to help organisations promote a culture of safety and comply with regulatory requirements. Our team of experienced safety professionals are dedicated to providing high-quality, cost-effective safety solutions that meet the unique needs of each client. Our safety services include:

Our team of experts is dedicated to helping our clients achieve their safety goals and create a safer, healthier workplace for their employees.

4 Sales and Service

We offer a wide range of high-quality safety products to help organisations protect their employees and comply with regulatory requirements. Our team of experienced safety professionals is dedicated to providing exceptional customer service and ensuring that all safety equipment is properly installed, tested, and maintained.

Our safety equipment sales and services include:

Equipment sales

We offer a wide range of safety equipment, from industry leading brands, including personal protective equipment (PPE), fall protection equipment, respiratory protection equipment, fire safety equipment, and more. We work with clients to identify the equipment they need to protect their employees and ensure compliance within their available budgets.

Equipment installation

Our team of experts can install safety equipment to ensure that it is properly set up and ready to use. We follow all manufacturer's instructions and safety regulations to ensure that the equipment is installed in the safest manner possible.

Equipment testing and certification

We can perform testing and certification to AUS/NZ standards on safety equipment to ensure that it meets all safety regulations and is functioning properly. We can assist with the following services:

- Height safety equipment test and inspection
- Fire safety equipment test and inspection
- Plug in electrical equipment test and inspection
- Earth leakage device test and inspection
- Insulating glove test and inspection

We are committed to providing our clients with high-quality safety equipment and exceptional customer service.

We work closely with our clients to identify their safety needs and provide customized solutions to meet those needs.
