HOW IT WORKS

STRIP CURTAINS

INSTALLTION

THICKNESSES

TECHNICAL DATA

Material Weight	610gsm-900gsm
Tensile Strength	1200N-3500N
Tear Strength	150N-600N
Material Fire Rating Examples	BS7837, M2 (NFP92507) BS7837:1996
Operating Temperature	-25 to +60 Deg C

Clear Standard

From small interior pedestrian doorways to large exterior warehouse doors, clear PVC is the workhorse of the family. Offers good light transmission and suitable for temperatures from +38C to -10C.

Perforated

A unique product only available from Safety Screens. Offers all the benefits of clear standard, but allows maximum ventilation both in and out of the premises.

Polar

A must for all chilled environments, including cold stores, freezer rooms and refrigerated vehicles. Suitable for temperatures -10 to -25C.

Double Ribbed

'Bumper Strip' or 'anti-scratch' is ideal for busy forklift traffic openings. The ribs takes the impact from vehicles and goods, minimising damage and maintaining clarity and light transmission.

Welding

Minimises the risk of 'welding flash' to other employees that may be in close proximity to welding. Available in red, green and bronze.

Coloured

Available in both opaque and translucent grades. Please visit our website for the full colour range.

Frosted

For storerooms and warehouse where the concealment of goods or privacy is essential, whilst still allowing sufficient daylight.

Anti-Static

The perfect solution for data centre curtaining, or any other area where static charge is an issue. Helps to reduce the static charge on both objects and personnel pass through.

HOW IT'S INSTALLED PVC STRIP CURTAINS

Roller Shutter Door Solutions

Roller shutter doors are less effective at retaining heat compared to more insulated alternatives like strip curtains

THE ROOT OF ALL EVIL

After Strip Curtains

- Warmer Unit
- 35% Less Wingeing
- Happy Staff
- More Profit

Before Strip Curtains

- Cold Unit
- Inefficient Workforce
- Negative Environment
- Less Profit

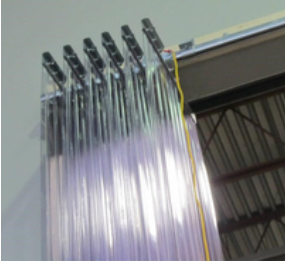

NATIONWIDE INSTALLATION

DELIVERED BUILT UP AND READY TO HANG

sliding track options available

Introducing our Sliding Strip Curtains—effortlessly versatile for dynamic workspace management. Crafted for easy access and temperature control, these curtains are a cost-effective solution. Engineered with durable materials, they enhance privacy, control dust, and reduce noise in various settings. Upgrade your workspace with our efficient Sliding Strip Curtains today.

WELDING STRIP CURTAINS

ENI589 WELDING CURTAINS

Introducing our ENI598-certified Red Tinted Welding Curtains—professionally crafted for welders seeking top-tier protection. The vibrant red tint enhances visibility, shielding eyes from harmful UV and IR radiation emitted during welding. Engineered with durability in mind, these curtains promise longevity in demanding work environments. Easy to install and adjust, they provide a versatile and efficient solution for a safe welding workspace. Elevate your safety and visibility with our compact and reliable Red Tinted Welding Curtains.
