

# WE ARE T-SIM SOLUTIONS

T-SIM Solutions provides software and service for transfer press simulation and optimization on new and existing tooling. T-SIM works with any press and any transfer system, tri-axis or crossbar.  
**If you work with transfer tooling, we can help!**

## SIMPLE PROCESS FOR GETTING STARTED

**It's easy to get going with T-SIM... All you have to do is:**

- 1** Add your press lines into the software
- 2** Complete a small study on 3-5 projects to verify equipment capabilities
- 3** Optimize all the projects in the press line

**When finished with the first press, repeat the process for the rest!**
