

NEW TOOLING SIMULATION AND OPTIMIZATION

Are you starting a new transfer tooling program soon? Trust the experts at T-SIM to make it the best one you've ever had! Know your production rates before you build and confidently launch your tooling at the HIGHEST possible production rates!

WHAT T-SIM CAN DO FOR YOU

Eliminate clash and clearance issues before tooling is built

Minimize initial setup time for tooling

Ensure a smooth and successful Home Line Run Off

Provides optimized transfer recipe for maximum production.

Provides piece of mind that your program will be a success.

TRUST

You can trust our expertise... our team of service technicians average 25 years experience in metal stamping industry and have completed 1000's of simulations. When you work with T-SIM, you are working with the best!

EASY

It's easy! We work directly with your suppliers during the design process to ensure your tooling is collision free, launches smoothly, and runs at the highest possible production rate.
