

Production Personified Through Innovation & Technology

Purpose of this marketing campaign is to target companies in the Microwave, RF relay, and RF Coaxial relay and interconnect industries. These companies serve the communications and instrumentation marketplace for both commercial and military. Envision Tech's expertise is within the realm of machining high precision covers and housings, filter housings along with various connectors.

Places you will find our machined components are:

- Interconnect
 - Military Defense fixed/mobile/ shipboard
- Test and measurement instrumentation from DC to 40 GHz
 - Commercial telecommunications infrastructure
 - Satellite communications ground stations
- Military defense, medical, satellite, wireless & test & instrumentation.
 - Radar, EW, antenna systems

Key things about Envision Tech:

Strategically located in the Midwest

3rd generation owned Since 1978

15k Sq/ft temperature controlled facility

ISO:9001 compliant

20 CNC machining centers

5 axis milling (15,000 RPM)

16 station pallet pool system for continuous production

Large and small batch production

Robojob automation for high production efficiency and lights out production

Swiss Turning

Citizen L25 and Citizen L32 Swiss turn lathes – Largest diameter to be machined on Swiss is 35mm (1.375") diameter – 8 axis, 1000 psi - 9 live tools - 8,000 RPM

State of the art inspection including:

Zeiss CMM

Keyence vision and laser systems

Detailed inspection plan for every production job
