Testimonials (Moving Banner with 1 visible at a time?)

This is magical pain cream

"Trevor Clark is a life changer! Believe me when I say it, this pain cream is pure magic! Between my husband and I, we have racked up the itises through car wrecks, bad luck, and growing older. We've taken the pills and tried the supplement. I've guinea pigged us both trying to make my own plant based pain reliever oils and creams because nothing was working that wasn't causing other problems. But I'm a total amateur....so...eh...😂 Trevor is a masterful REAL clinical herbalist—not the mail order kind. Lol. His plant healing

knowledge is unending, and he's changed the lives of so many by giving us our health back! You won't find any other cream better than this expertly crafted jar of heavenly RELIEF! Go read his bio, and the list of ingredients. Be mind blown! THANK YOU!" **Heather F. Birmingham, AL**

Better than prescription pain meds

"Clark's Herbal Remedies pain cream is by far 10000000x better than any prescription pain medication that I've ever taken. So please, if you suffer from occasional neuropathies, muscle pain, back pain, elbow, shoulder.... pretty much anything related along those lines - BUY THIS ASAP!!!! You'll thank me."

Amy P. Bradenton, FL

Helps me sleep

"Great product! I use my cream daily and in the evening to help me sleep through my pain. Smells wonderful and the only cream my 91 year old Mom allowed me to massage on her aching shoulders. Thank you Trevor Clark  " **Terrie S. Lake Tahoe, CA**

This Truly is the BEST

"It works fantastically. We have used it for neck/nerve irritation pain, knee pain, leg pain, elbow and back. Every time, complete relief! Thank you Trevor Clark for sharing your knowledge, passion and for making such a quality product!" **Kelli H.**

Johnson City, TN

FAQ (Collapsible Answers)

Does it work?

Absolutely! You will start to feel relief within 1 minute. After 15 minutes you will feel its full effects. At Clark's Herbal Remedies, we stand by the effectiveness of our Pain Cream, which is truly more than just a product—it's a carefully crafted solution born from clinical experience and expertise.

Who is this natural pain relief cream for?

Our natural pain relief cream is designed for anyone seeking relief from the discomfort of muscle or joint pain. Whether you're dealing with stiffness, cramping, aching, swelling, tenderness, or inflammation, this soothing formula is your companion on the path to comfort and well-being.

Please Note: For the safety of our youngest users, we advise that children under 5 years of age refrain from using this cream. We do not develop the liver enzymes necessary to metabolize the methyl salicylates found in Birch Bark until around the age of 5. We also advise against using it during pregnancy.

How do I use it?

Apply a generous amount of cream to the affected area. Massage gently until fully absorbed. Feel physical relief within 1 minute! Enjoy the lasting benefits of relief as you engage in your day with renewed vitality.

How long is your pain cream good for?

We use a combination of natural preservatives to give our pain cream a shelf life of 1 year.

Are your preservatives natural?

Yes! We use a completely natural preservatives system. Sweet Birch is used for both its pain relieving effects, as well as its effects against bacterial invasion. In conjunction with Anisic Acid, derived from the herb Sweet Anise, which also helps to preserve our cream against bacterial invasion. We also use the antioxidant Vitamin E to protect the oils in our cream from oxidation.

What's your shipping and delivery times?

We strive to provide you with a seamless shopping experience. Once your order is placed, shipping takes just **1-2 days** to process on our end. Delivery times ultimately depend on the USPS.

{About}

Meet Trevor

[Portrait image of Trevor Clark, with full name under it]

A Personal Journey Toward Healing

Trevor's connection to herbal treatments is deeply personal. After a life-altering spinal fracture resulting from a serious car accident in 2003, Trevor's passion for herbal medicine was ignited. Following surgery, Trevor faced a painful journey that left him bedridden for four long years, battling peripheral neuropathy and fibromyalgia.

While given a cocktail of 11 drugs, including narcotic painkillers, initially managed his condition's symptoms, they offered no hope of a return to a fulfilling life. A pivotal moment arose when a doctor mentioned the possibility of "alternative remedies." Inspired by this suggestion, Trevor's determination blossomed, leading him to explore the world of herbal medicine. His quest began with readings on ethnobotany, which eventually guided him to a miraculous tree bark tea from Brazil, which took away most of his fibromyalgia symptoms.

Since that transformative moment, Trevor has immersed himself in Botanical Medicine, driven by a profound passion for improving people's lives through all-natural remedies.

Trevor's Journey Into Herbal Healing

Trevor's personal journey into the world of herbal healing was ignited by a desire to alleviate his chronic pain. This pursuit led him to graduate from Bastyr University, one of the top Herbal Medicine schools in America, where he immersed himself in the study of healing plants and their remarkable properties.

Trevor acquired an in-depth understanding of the clinical applications of herbs, supported by substantial research and advanced knowledge in product formulation. His journey didn't stop there; he further honed his expertise as an adjunct faculty member of Bastyr University and botanical medicine researcher, delving deeply into the heart of herbal medicine.

Notably, he identified a pharmaceutical compound within the forgotten Cherokee Indian herb Crossvine (*Bignonia capreolata*)—an achievement that underscored the timeless wisdom embedded in traditional practices. This groundbreaking work set the stage for his role in standardizing a hallucinogenic Amazonian brew, assisting his mentor in applying for an Investigational New Drug license from the FDA for treatment resistant depression.

Ultimately, this rich tapestry of experience culminated in the opening of his own clinic, where he created a pain cream

tailored to his clients' needs. This innovative formulation became the impetus for Clark's Herbal Remedies, allowing Trevor to share his deep passion for natural healing with a broader audience. Every product we offer reflects his journey, fusing personal experience, scientific knowledge, and a heartfelt commitment to improving lives through the power of nature.

At Clark's Herbal Remedies, we invite you to join Trevor on this journey of healing and discover the natural path to wellness. Together, let's embrace the power of nature!

{Ingredients}

Made with the strongest natural pain relieving plants available!

Six Active Botanical Ingredients

(pictures of each ingredient)

Arnica

We specifically use ***Arnica cordifolia***, a native wildflower harvested from the pristine Cascade Mountains, for its exceptional healing properties in our natural pain relief cream. It helps your body in its natural healing process, by increasing blood flow to the applied areas. This wild species offers a richer concentration of phytochemical compounds compared to the commonly cultivated ***Arnica montana***, making it a superior choice for effective relief.*

Sweet Birch

The essential oil extracted from the bark of the ***Betula lenta*** tree, commonly known as Sweet Birch, is a treasure trove of healing properties, primarily composed of the constituent group **methyl salicylates**. You may recognize the delightful, minty scent of this remarkable herb, as it shares aromatic compounds similar to those found in **Wintergreen** and **Poplar leaf buds**. However, the magic of Sweet Birch extends far beyond its captivating fragrance. Traditionally, Sweet Birch has been revered as an aromatic muscle rub, celebrated for its effectiveness in alleviating occasional muscle pain. The soothing properties of this herb are perfect for those seeking relief from the strains of daily life or post-exercise discomfort.*

Yarrow

This common meadow herb, known as ***Achillea millefolium***, carries a rich history that dates back to the

legendary Greek warrior, Achilles. According to tradition, he carried yarrow into battle, using its healing properties to treat the painful wounds of his fellow warriors, showcasing its long-standing reputation as a powerful natural remedy. In our natural pain relief cream, yarrow brightens the formulation with its beautiful light blue color, a delightful little accident attributed to the herb's essential oil. But its contributions go far beyond aesthetics—yarrow is revered for its remarkable efficacy in soothing discomfort and promoting healing.*

Copaiba Balsam

Hailing from the lush landscapes of Brazil, ***Copaifera officinalis***, commonly known as Copaiba, plays a vital role in our natural pain relief cream. This remarkable herb is renowned for its ability to help the body decrease occasional pain while also serving as a natural fixative for the lighter aromatic ingredients in the cream. The primary constituent of Copaiba, the aromatic terpene caryophyllene, works uniquely on the body's endogenous cannabinoid receptors, creating a botanical synergy that enhances its therapeutic effects. This interaction supports the body by soothing occasional inflammation, making Copaiba a beloved ally in the realm of natural healing.*

Clary Sage

Salvia sclarea, a cherished herb from the Mediterranean, is loved for its remarkable ability to calm both the body and mind, making it an essential addition to our natural pain relief cream. Its soothing properties play a crucial role in helping the body release occasional pain, creating a harmonious balance that nurtures both physical and emotional well-being.*

Ylang Ylang

The ***Cananga odorata*** tree, native to the lush landscapes of the Pacific Islands, graces our natural pain relief cream with its soothing essence. This enchanting flower is revered not only for its captivating aroma but also for its remarkable ability to induce relaxation and tranquility. Ylang Ylang's calming effects allow you to gently release occasional pain and tension, fostering a sense of peace within the body and mind.*

Natural Preservative System (Pictures)

Anisic Acid

Sweet Birch

Vitamin E
