

Hi there

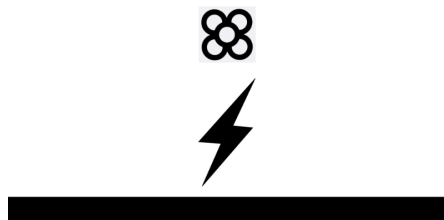

I am currently looking for a design for an inner forearm tattoo, similar to the one the main character has in the game Far Cry 3.

The main idea of the tattoo is that there is a set of achievements and each one of them is represented by a symbol on the character's left forearm. Each new achievement throughout the game adds a new symbol to the character's forearm. In between the symbols there are those sharp curves/dots that don't make much sense but visually connect the symbols and make the composition of the tattoo complete. The main character starts the game with an empty tattoo (just the starting bottom line) and by the time he finishes the game his tattoo gets completed and full of symbols up to the wrist.

For my tattoo I already have the next two symbols I want to have on it.

The symbols should be positioned like this

I need a general design for this tattoo with the two symbols, design for the bottom line/start of the tattoo, design for the shapes to visually connect the symbols together. I need the bottom line/shapes to be simple and much less sharp and on the pictures from the game, just something minimalistic. I'm going to be adding more symbols to the tattoo in the future so this design should be extendable.

Find the references below to get more details of what I'm looking for.

Thanks and looking forward to working with you

Reference 1. Full tattoo from the game

Reference 2. Almost full tattoo from the game/Tattoo at the beginning of the game

Reference 3. A person exactly recreated the tattoo
