

# Site Map for EightPillarsERP.COM

Two page designs are requested, the ones circled in red, and a wireframe has been provided for each one.

- The home page (landing page), has five sections, not counting the header and footer.
- The “Change Management” design is important because ‘change management’ is one of the Eight Pillars the site is named after.
  - The Eight Pillars logo features eight circles, each with a different color. Each of the eight ‘8 Things to Get Right’ pages should use one of those distinct colors as a theme.
  - The layout of each of the eight pillar pages should consistent – the same for each one. So I am only asking for one of the eight pages. I can change the color scheme for each one.
