

Brief Description of Label Design Our company is an international supplier of additives, whose production is located in Europe. We are releasing a batch of 4 new products from the HERBOLOID brand. We need a design for 4 labels for our drugs, which will be sold individually or in a set of 4 pieces. If you place these 4 jars next to each other, they should look harmonious together. We want a label that stands out with a bold design that anchors itself in natural elements, but is also modern and clean. Green is our company color, so it must be used for the logo. We wanted a common design style that would be used not only for the first batch of 4 products, but also for a further line of different products. Pacifista - AntiStress Complex Mentalsin - Brain Nootropic Complex Fluxorid Prostate Health Complex Helminot Herbal AntiParasitic Complex Attached is a sample size label. I have also attached a picture of the label of our old products. undefined The Herboloid logo and inscription should be at the top of the label, as on the old sample. All bottles are white. We are looking for a fast turnaround time and a designer who is very responsive to feedback. Target market(s) Health-conscious consumers aged 18 to 50. Targeted products for men and target audience based on ingredients. Label text:

Anti-stress complex

Front:

Pacifista

Anti-stress complex

60 capsules; 60 servings

Sides:
