

Focus on Education, Not Paperwork.

The leading cloud-based solution for tracking student
clinical activities

Easy to Use

Typhon's user-friendly design and intuitive workflows ensure quick adoption and simple operation.

Remarkable Customer Service

Our friendly client education specialists are always at your service. And unlike our competitors, we never charge extra for support.

Low Price, High Performance

Typhon is a robust, fully customizable, and intuitive system at an affordable price point for programs of all sizes.

Secure Website

The Typhon platform is completely secure, ensuring protection of all data—sensitive or otherwise.

Peer Reviewed

The efficacy of the Typhon system, its data, and reports have been used to author dozens of scholarly works.

Built-In Scalability

You have the power to scale the system to match the size of your program for each new school year.

Fully Customizable

Typhon's system is built specifically for health degree programs and is easily customizable to meet your specific needs.

Optimized for Mobile

Typhon goes where you do. Mobile-friendly and accessible via any connected device including phones and tablets, you can easily access and manage your account on the go.

More than 1000 Programs Trust Typhon

Perfect for:

Program Directors

Monitor student clinical experiences through reports, curriculum mapping, and evaluations.

Clinical Coordinators

Easily manage the ever-growing list of site/preceptor affiliation agreements and appropriately schedule students.

Administrative Assistants

Access and manage the details of every student in your program, including licenses and immunization documents.

Faculty & Preceptors

Evaluate students, approve clinical experiences, and update contact info as needed.

Students

Report clinical experiences, take evaluations, and build a portfolio to use when job hunting after graduation.

8 Customizable Core Modules

Patient Tracking

Students use case logs and time logs to enter experiences. Faculty easily monitor students and run individual or group reports.

Contact Databases

Manage all relevant details of everyone in your program, including contact info, immunizations, licenses, supporting documents, and more.

Clinical Site Database

Manage details of clinical sites, including addresses, contact information, related preceptors, and contract documents.

Evaluations & Surveys

Design and administer web-based evaluations about courses, sites, students, preceptors, and more. Results are viewed in real-time.

Student Scheduling

Create calendars of student events & rotations, and optionally allow requests for preference-based scheduling.

Curriculum Mapping

Map your program and course objectives, align them with your accreditation requirements, and track your students' progress.

Student Portfolios

Students can create and customize their own multi-page portfolio website to showcase their experience—an invaluable tool for seeking employment after graduation!

Document Management

Securely store, share, and review documents online—including coursework, immunizations, licenses, contracts, and more.
