

# The **Trusted Leader** in Student Tracking Systems for Nursing & Health Education

Our Robust Student Tracking Systems  
Let You Focus on Education. Not Paperwork.

## **EASY TO USE**

The user-friendly format and intuitive flow make for easy implementation and day-to-day use.

## **POWERFUL**

A robust solution handling everything from student scheduling to evaluations, from any device.

## **AFFORDABLE**

Low annual subscription, no multi-year contracts, and pay-per-student pricing.

## **STREAMLINED WORKFLOW**

Reduce paperwork and customize users' capabilities and roles within the system.

## **EXCELLENT CLIENT SUPPORT**

Our friendly account management team offers personal attention from the very start.

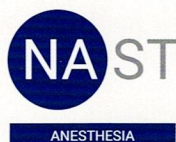

## **CUSTOMIZABLE**

Tailor the system for your specific needs without waiting for us to make changes.

*Typhon Group is  
the #1 Choice for  
Nursing and Health  
Education Programs*

*For over 20 years, Typhon Group has been creating advanced, powerful and easy-to-use student tracking software for pre-licensure nursing, advanced practice nursing, physician assistant programs, and other types of health education programs. Our simple web-based interface is fully configurable to your school's student tracking needs, and easily accessible from any computer, tablet, or handheld device.*

We offer the most advanced healthcare student tracking software available while keeping it easy to use.

All five products share these eight core modules, but each has its own unique features and customizable options.

### CLINICAL ENCOUNTER TRACKING

Students use case logs and time logs to enter experiences. Faculty easily monitor students and run individual or group reports.

### BIOGRAPHIC DATABASES

Manage all relevant details of everyone in your program, including contact info, immunizations, licenses, supporting documents, and more.

### CLINICAL SITE DATABASE

Manage details of clinical sites, including addresses, contact information, related preceptors, and contract documents.

### EVALUATIONS & SURVEYS

Design and administer web-based evaluations about courses, sites, students, preceptors and more. Results are viewed in real-time.

### STUDENT SCHEDULING

Create calendars of student events & rotations, and optionally allow requests for preference-based scheduling.

### CURRICULUM MAPPING

Map your school's program & course objectives, align them with your accreditation requirements, and track your students' progress.

### STUDENT PORTFOLIOS

Students create & customize their own multi-page portfolio website to showcase experiences. Invaluable for seeking employment after graduation!

### SECURE DOCUMENT MANAGEMENT

Documents are securely stored, shared, and reviewed online, including coursework, immunizations, licenses, contracts, and more.

Other standard features include encrypted online access, administrative customization tools, complete video tutorials with chapters, and automatic smartphone optimization.

## Advanced, Powerful & Easy-To-Use Software for Everyone

**Program Directors** - Monitor student clinical experiences through reports, curriculum mapping, and evaluations.

**Academic Coordinators** - Map curriculum objectives to accreditation standards and monitor student achievements of targets & goals.

**Clinical Coordinators** - Manage the ever-growing list of site & preceptor/supervisor affiliation agreements and schedule students appropriately.

**Administrative Assistants** - Access and manage the details of every student in your program, including licenses and immunization documents.

**Faculty** - Monitor the progress of student clinical experiences, ensuring the objectives of each course are being met.

**Preceptors/Supervisors** - Evaluate students, approve clinical experiences, and keep contact info up-to-date.

**Students** - Report their clinical experiences, take evaluations, and build a portfolio to use when job hunting after graduation.
