

CuelQ is a smart camera system that takes cue sports to the next level. The system augments game play and allows players to bring extra dimensions to their play and practice.

This initial version brings the ability to record, review and share videos of your pool session , with tracking functionality in the pipeline which will unlock many more features.

The record, review and sharing functionality unlocks the following:

- Reviewing your best shots from gameplay
- Exercising drills to hone your shots and seek feedback from coaches, mentors or friends
- Sharing clips of your best shots on messaging apps like WhatsApp or social media (Facebook, etc)

The CuelQ Cloud is your central source of all of your games and statistics. Recordings and other data from all CuelQ venues will appear on your account at <https://app.cueiq.net>.

Future releases of the CuelQ system will feature ball recognition and tracking. With advanced assessment of table state, CuelQ will bring further dimensions of gameplay and skills development including:

- Suggestions & assessment
 - Shots / potting angles
 - Positional play
- Automated time trials
- Player handicaps & levels
- Fun games for groups (e.g. Killer)
- Layout recording & sharing
- ...and much more!

Logging in / Registration

1. Scan the QR code above or access <https://app.cueiq.net> on a browser on your personal mobile device/phone using Google, Microsoft or Facebook) and choose a Nickname
2. On your mobile device/phone select 'Show Login Code'
3. Access the CuelQ table tablet - this might be near the table or you might need to ask venue staff to issue one to you
4. On the CuelQ table tablet, you should be on the 'New Session' page (if not select 'End Session' from the top right of the screen)
5. Select 'Add Player' and show the Login QR Code to the camera of the CuelQ system tablet
6. Repeat for all users in your group (N.B. you can add guest users to your session, but they won't be able to access recordings)

Start playing

1. Select 'Start Game' on the 'New Session' screen
2. Select 'Play' in the 'Free Play' game item to start the most basic game where you can record and review your game
3. On the 'Free Play' game screen press 'Start' next to the 'Stream' label which will show a live feed of the table
4. Setup the table for a game or drill, then when you are ready press 'Start' next to the 'Recording' label
5. You can stop and restart recording as many times as you like. We suggest you do this after each game or drill to create separate videos

Reviewing your content

1. Videos will be available on the tablet as soon as capture is stopped, just select 'Play' to view
2. Videos will also be uploaded to CuelQ cloud and be available on your personal device to review, create clips and share shortly after stopping recording
