

Why Supervise the Consumption of Pain Medication?

Chronic pain is a widespread diagnosis in the U.S. and is projected to rise in response to aging populations.

Almost 100% sensitivity and efficiency render drug safety monitoring a crucial and valuable tool for a provider's practice by the use of technological developments of the LC/MS/MS.

Reports find a high rate of non-dependence to pain medication treatments which is related to deprived pain control and greater inclusive healthcare costs.

North West Labs Amenities

- Tailored collection and pick-up services
- A widespread drug safety testing menu
- Customizable drug testing possibilities
- Remote consultation with our toxicology experts
- Simple, easy-to-read and time sensible reports
- Numerous reporting options

Welcome to North West Labs.

We want to thank you for your interest in our services.

At North West Labs we strive at providing our patients with the best quality care by providing physicians, hospitals, medical centers, clinics, and healthcare facilities with state-of-the-art urine drug confirmation testing for the most commonly scheduled prescription drugs and narcotics. The highly complex method developed by our team will most definitely detect, and confirms the presence and concentration of scheduled prescription drugs and illicit narcotics which will aid your practice in providing a lab-guided medication management program for your patients.

Why Choose North West Labs as Your Partner?

Precise results through the most innovative technology.

- All of our drug safety monitoring testing will utilize the LC/MS/MS, otherwise known as the "Superior Standard" for analytical quantitation.
- State-of-the-art method along with precise results means you can trust *North West Labs* to help formulate safety decisions for your patients.

Prompt Results

- We provide our partners with industry leading 48-hour turnaround time for quantitative results. We accomplish this through the optimization of our laboratory testing procedure and by employing the most qualified and experienced laboratory staff.

Comprehensive Customized Panels

- We deliver a widespread customizable offering of urine drug testing panels.

Facts

In the U.S., these factors are intensified and supported by:

- Over 4 billion prescription medications are prescribed yearly
- 50% of patients do not take their medication as prescribed and directed
- 55,403 drug overdoses in 2016
- About 20,101 of prescription drug overdoses are caused by pain killers
- 46% of prescription drug users also take over the counter medications
- At least 1 in 25 Americans is on a prescription drug regimen which poses a major risk for a Drug to Drug interaction (DDI)
- About 32% of prescriptions are never filled
- In the U.S., non-adherence leads to 125K deaths annually

"Five vital inclinations are transpiring to the U.S. forcing efficient drug safety administration to be priority of all healthcare concerns."
